1 Introduction

The Jadeer User Guide is intended to help company users efficiently utilize and navigate the features available within the Jadeer platform. Jadeer is an AI-powered recruitment system designed to support companies throughout the hiring process by simplifying job posting creation, applicant management, candidate evaluation, and recruitment decision-making.

The platform provides intelligent recruitment support through AI-generated job descriptions, interview question generation, candidate ranking, psychometric analysis, voice tone analysis, and automated evaluation reports. These features assist companies in identifying suitable candidates more efficiently while reducing manual recruitment effort.

This guide provides step-by-step instructions to help company users create and manage company profiles, publish job postings, customize interview questions, monitor applicants, review candidate evaluations, access generated reports, and manage recruitment activities through the platform. By integrating AI-supported analysis with an organized user interface, Jadeer aims to improve recruitment efficiency and support more informed hiring decisions.

2 Welcome Page

When opening the Jadeer application, the company user will first see the Welcome Page shown in Figure 1. This page allows companies to access the platform by logging in or creating a new account.

To continue using the system:

- Tap the “Log In” button to access an existing account.
- Tap the “Sign Up” option to create a new company account.

Figure 1: Jadeer Welcome Page.

3 System Access

3.1 Create Company Account

If this is your first time using Jadeer, tap the “Sign Up” option on the Welcome Page to create a new account.

To create a company account:

1. Select “Company” as the account type.
2. Enter the company name.
3. Enter the representative’s full name.
4. Enter the company email address.
5. Continue filling the required information.
6. Tap the arrow button to proceed.

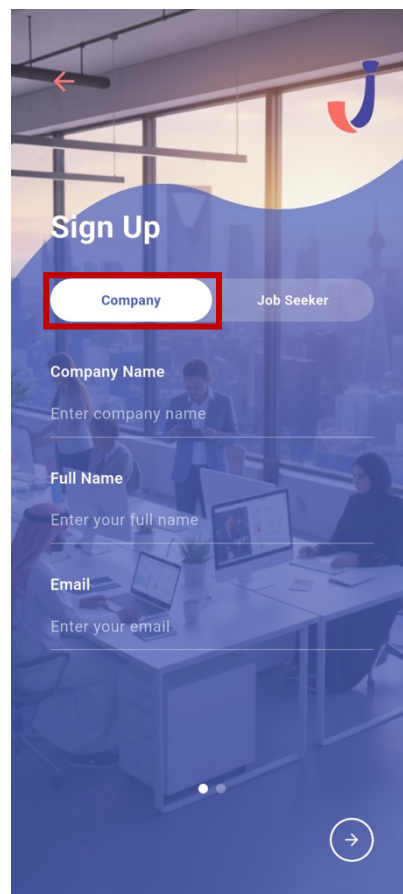

Figure 2: Company Registration Page.

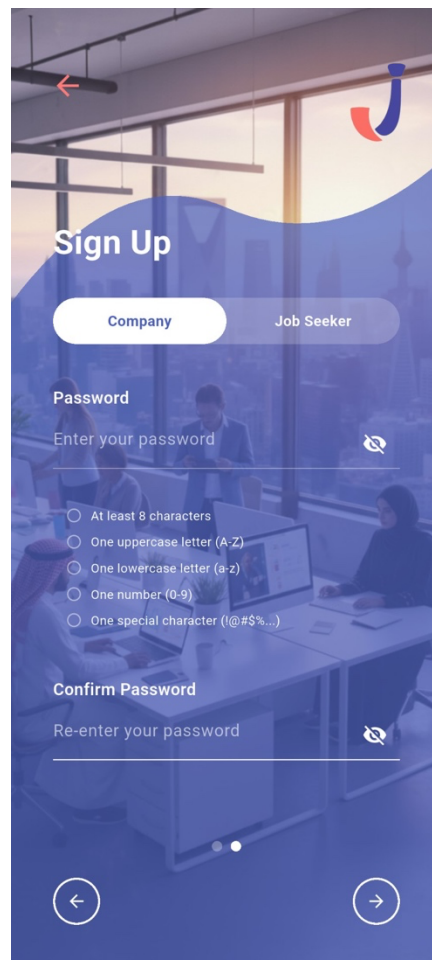

3.1.1 Password Requirements Validation

During account creation, the company user must create a secure password that satisfies the system requirements.

The password must include:

- At least 8 characters.
- One uppercase letter.
- One lowercase letter.
- One number.
- One special character.

As the user enters the password, the system validates each requirement automatically.

The screenshot shows a mobile application interface for signing up. At the top, there's a 'Sign Up' header with a back arrow on the left and a logo on the right. Below the header, there are two tabs: 'Company' (selected) and 'Job Seeker'. The main section is titled 'Password' and contains a text input field labeled 'Enter your password' with a toggle icon. Below the input field, there are five radio button options for password requirements: 'At least 8 characters', 'One uppercase letter (A-Z)', 'One lowercase letter (a-z)', 'One number (0-9)', and 'One special character (!@#\$%...)'. Below these options is a 'Confirm Password' section with a text input field labeled 'Re-enter your password' and a toggle icon. At the bottom of the screen, there are two circular navigation buttons: a back arrow on the left and a forward arrow on the right.

Figure 3: Password Requirements Validation.

3.1.2 Handling Invalid Input

If the company user enters incomplete or invalid information during registration, the system will display validation messages to help correct the input.

Examples of invalid input include:

- Leaving required fields empty.
- Entering an invalid email address.
- Using an email address that already exists.
- Creating a password that does not meet the security requirements.

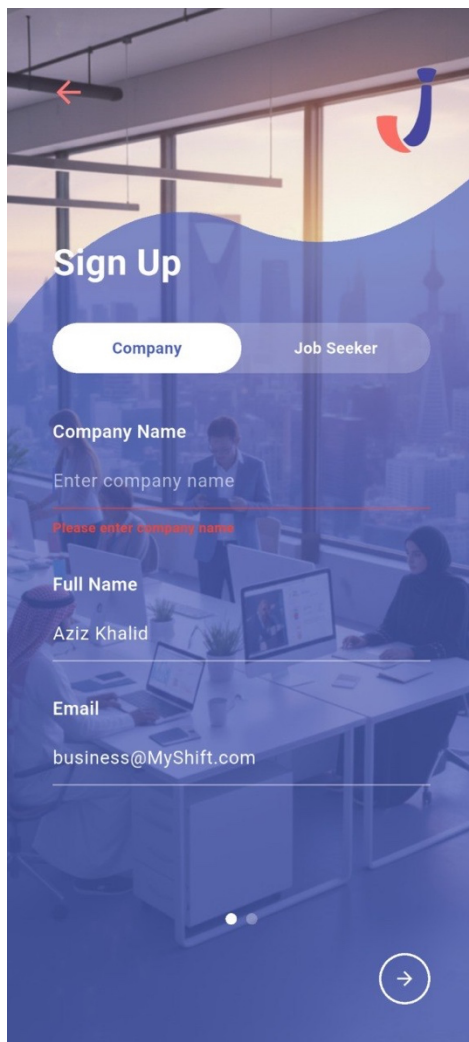

Figure 5: Missing Required Field Validation Message.

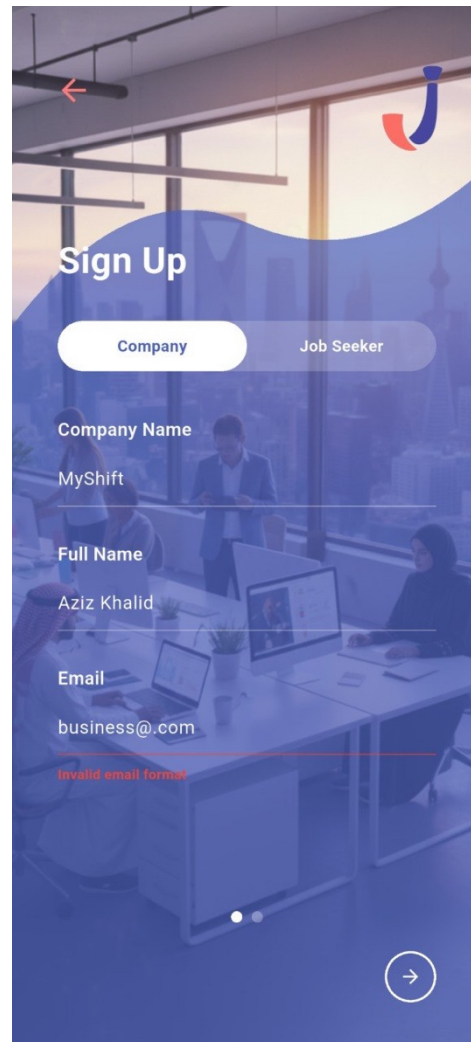

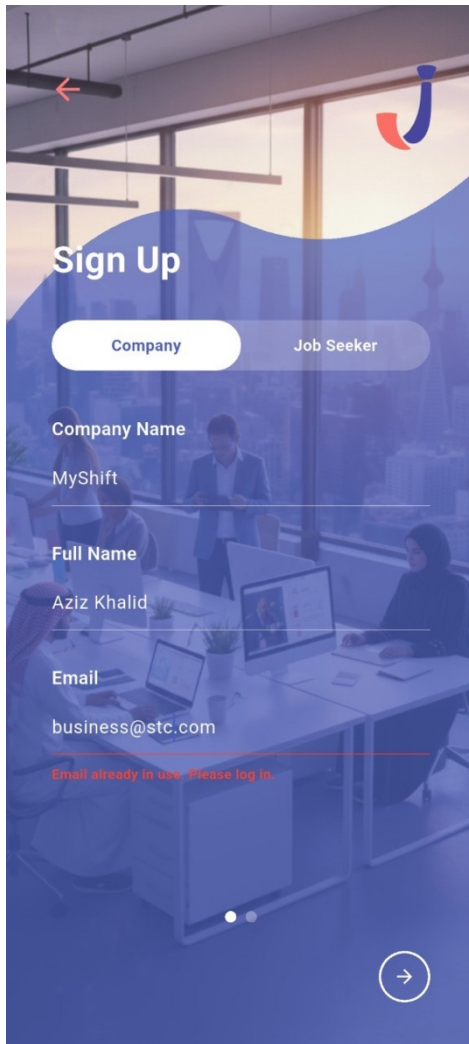

Figure 4: Invalid Email Format Message.

Confirm Password
.....

Figure 7: Password Security Requirement Validation.

3.1.3 Email Verification (OTP)

After completing the registration process, the system sends a 6-digit verification code to the company's registered email address.

The company user must enter the verification code to continue the account creation process.

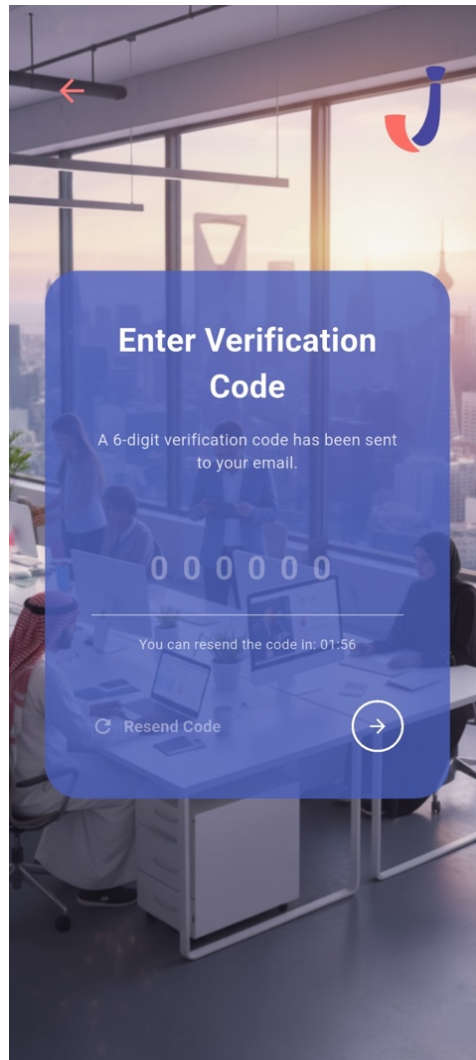

Figure 8: Email Verification Page.

3.1.4 Receiving the OTP Verification Email

The verification email contains the 6-digit OTP code required to verify the company account.

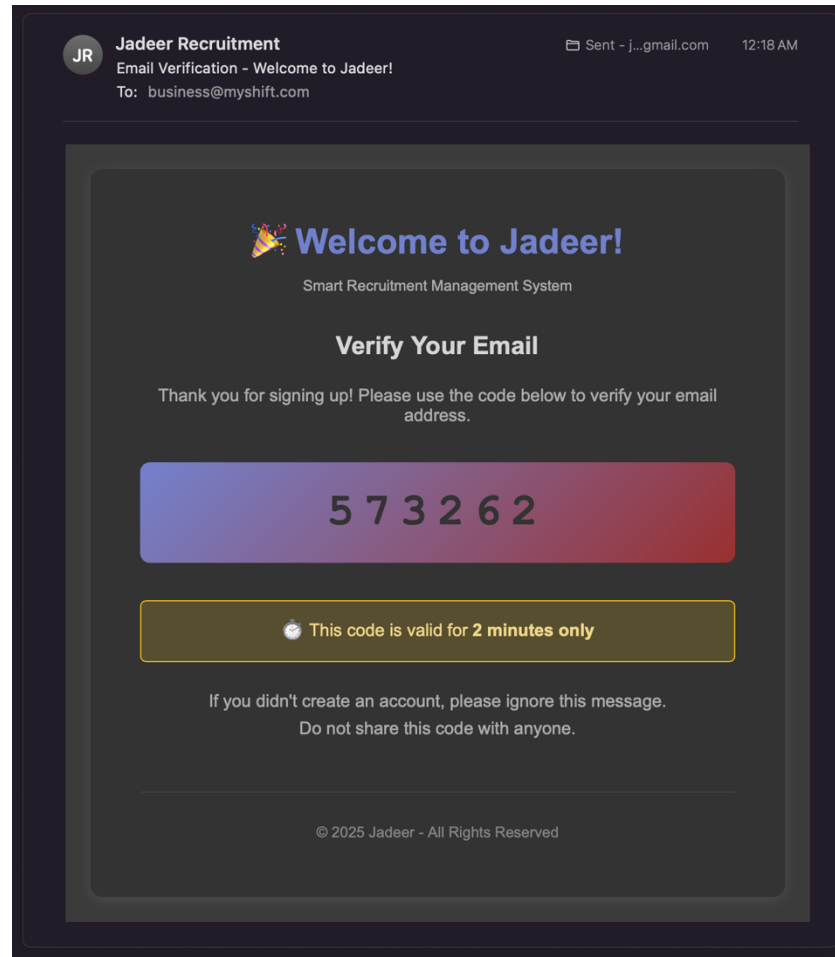

Figure 9: OTP Verification Email.

3.1.5 Successful Email Verification

After entering the correct verification code, the system displays a confirmation message indicating that the email has been verified successfully.

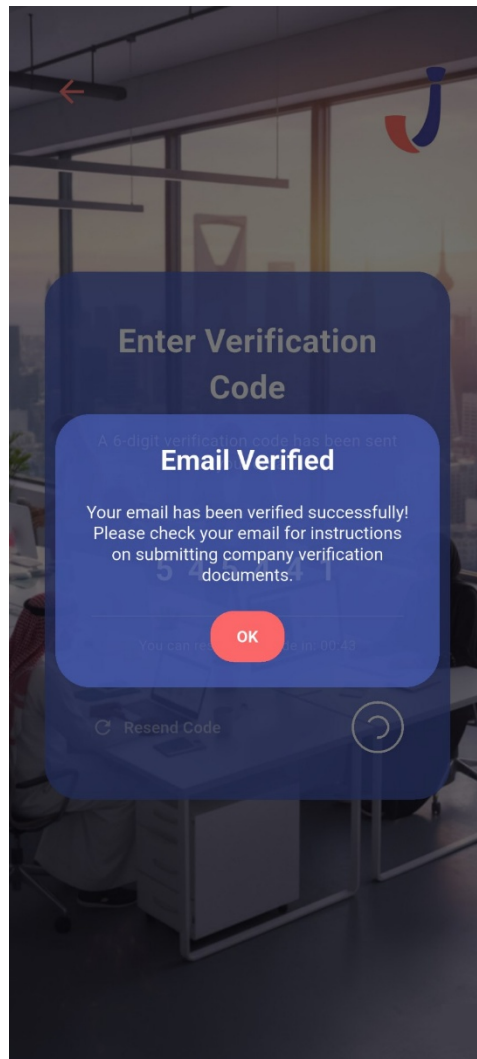

Figure 10: Successful Email Verification Message.

3.1.6 Company Verification Instructions

After verifying the email address, the company receives another email containing instructions for submitting company verification documents required for account approval.

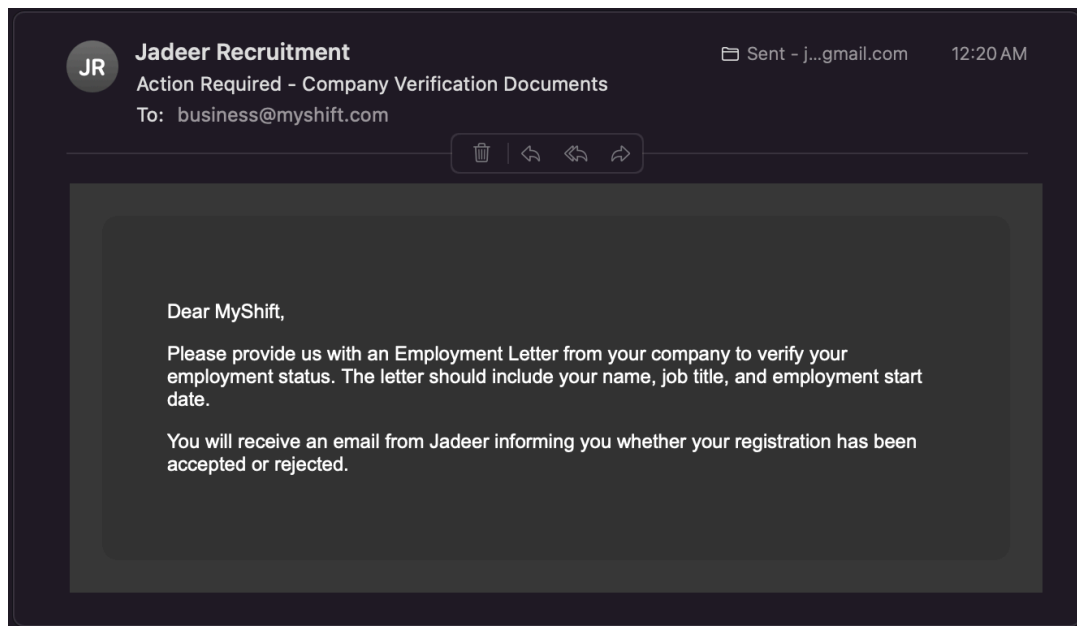

Figure 11: Company Verification Requirements Email.

3.1.7 Account Approval Process

After submitting the required company verification documents, the account will remain under review until approved by the system administrator.

If the account has not been approved yet, the system will display a pending approval message when attempting to log in.

Figure 12: Pending Account Approval Message.

3.1.8 Registration Approval Status

After reviewing the submitted company verification documents, the system administrator may either approve or reject the registration request.

If the registration is approved, the company receives an acceptance email and can access all platform features.

If the submitted documents are incomplete or invalid, the company receives a rejection email explaining the reason for rejection.

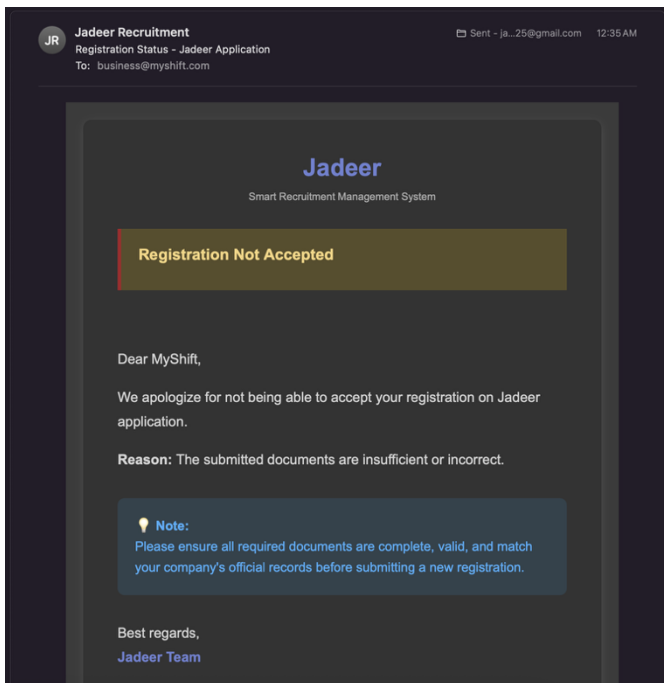

Figure 14: Registration Rejected Email

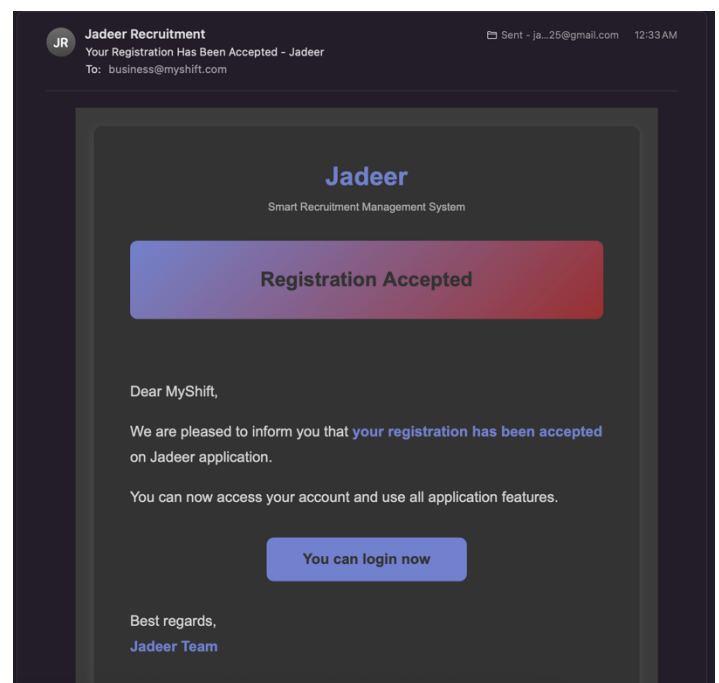

Figure 13: Registration Accepted Email

3.2 Logging In

After the company account has been approved by the system administrator, the company can log in using the registered email address and password.

To log in:

1. Enter the registered email address.
2. Enter the password.
3. Tap the arrow button to access the account.

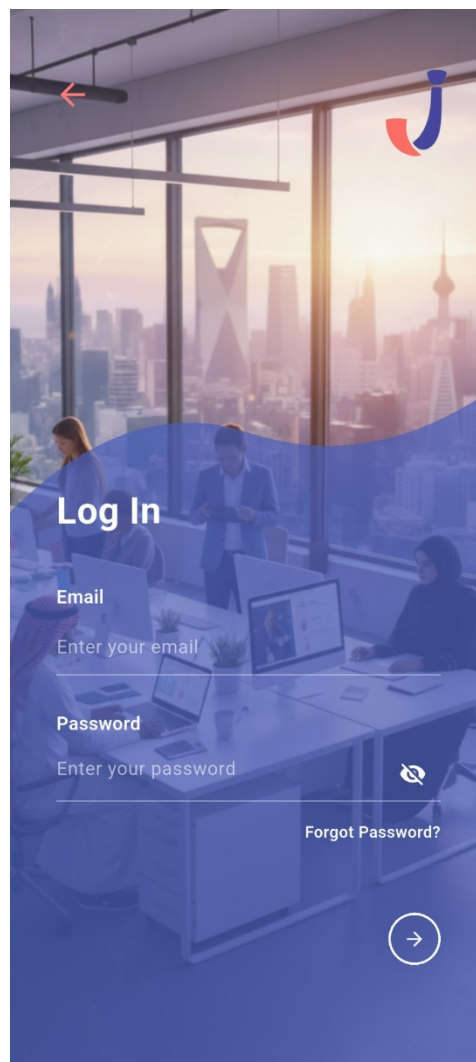

Figure 15: Company Login Page.

3.3 Forgot Password

If the company user forgets the account password, they can reset it using the “Forgot Password?” option on the login page.

To reset the password:

1. Tap “Forgot Password?”
2. Enter the registered email address.
3. Submit the request to receive a verification code.

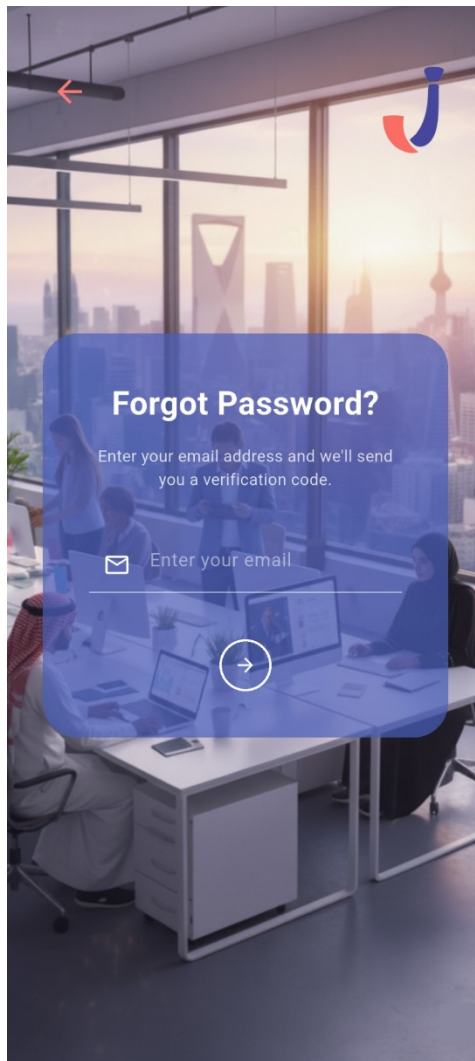

Figure 16: Forgot Password Page.

3.3.1 Receiving Password Reset Email

After submitting the registered email address, the system sends a password reset verification code to the company's email.

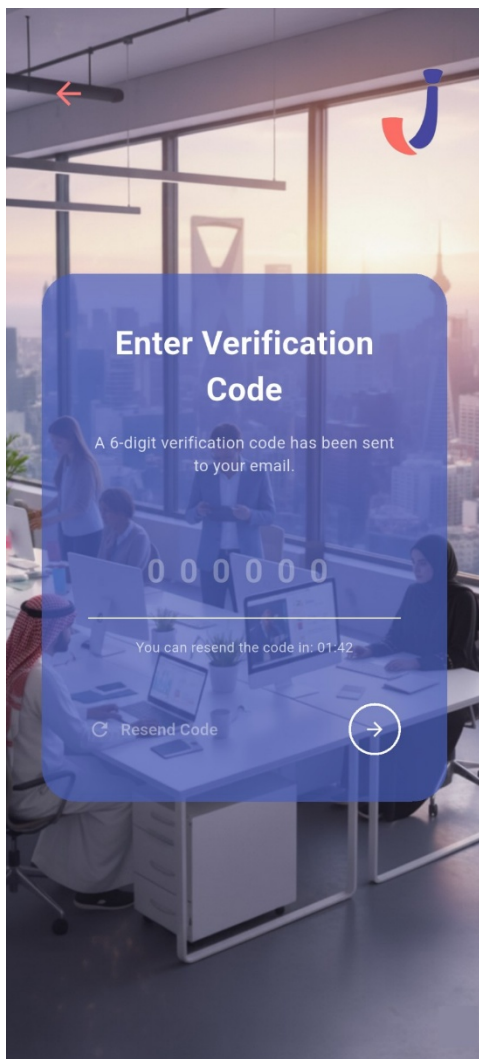

Figure 17: Password Reset Verification Page.

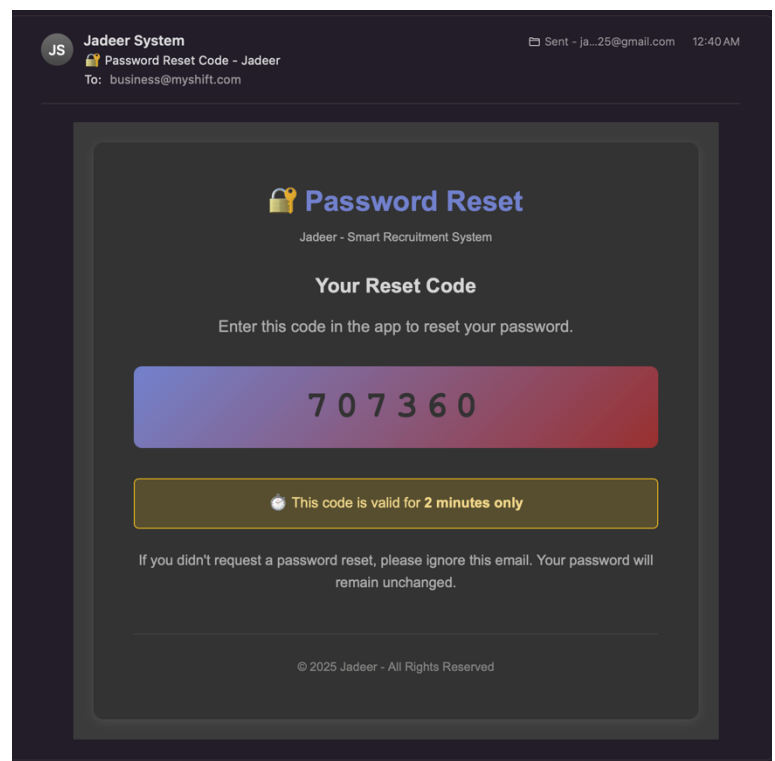

Figure 18: Password Reset Email.

3.3.2 Setting a New Password

After entering the verification code correctly, the company user can create a new password. The new password must satisfy the system security requirements.

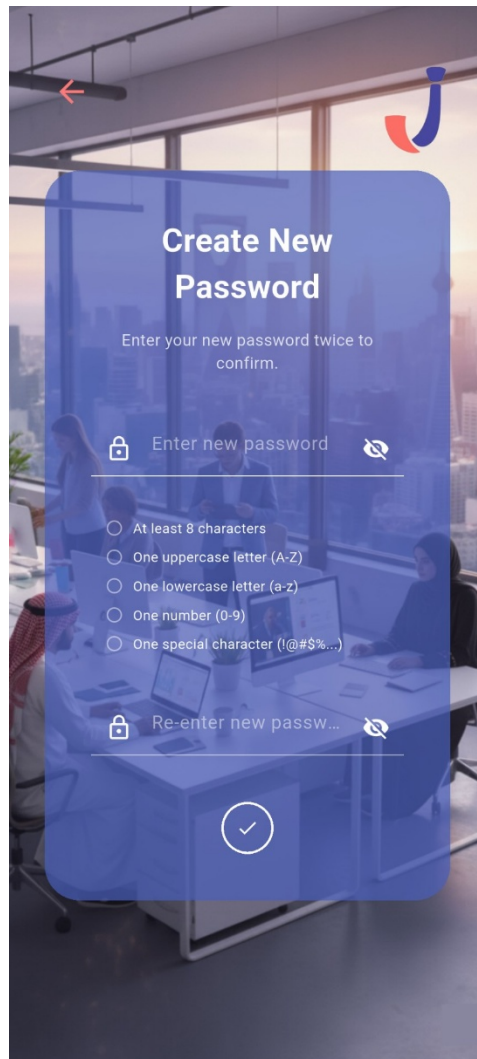

Figure 19: Create New Password Page.

3.3.3 Password Reset Confirmation

After successfully resetting the password, the system displays a confirmation message indicating that the account can now be accessed using the new password.

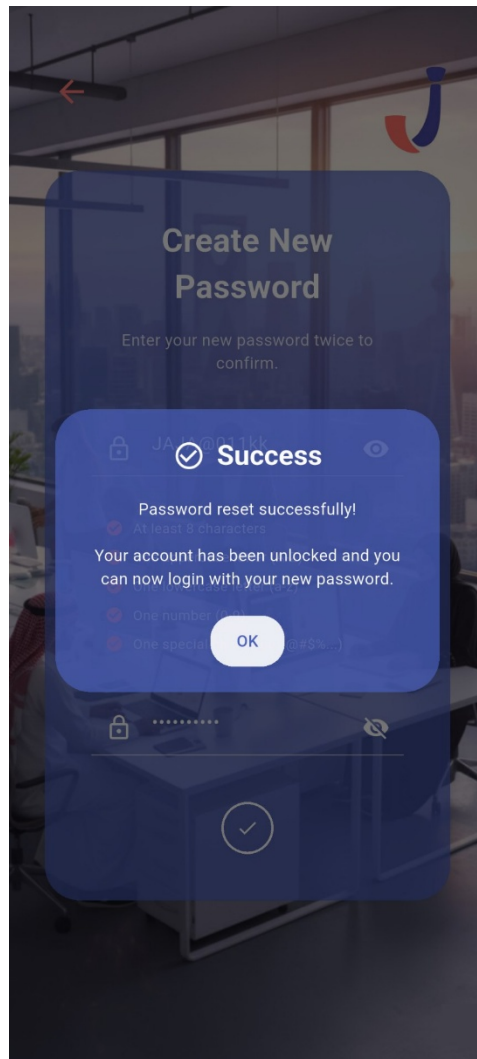

Figure 20: Password Reset Success Message.

4 Settings and Account Management

This section explains the settings and account management features available for company users in Jadeer, including appearance customization, notification preferences, password management, account information, logout functionality, and account deletion.

4.1 Accessing Settings

After logging into the system, company users can access the Settings page by tapping the settings icon located at the top-right corner of the Home Page.

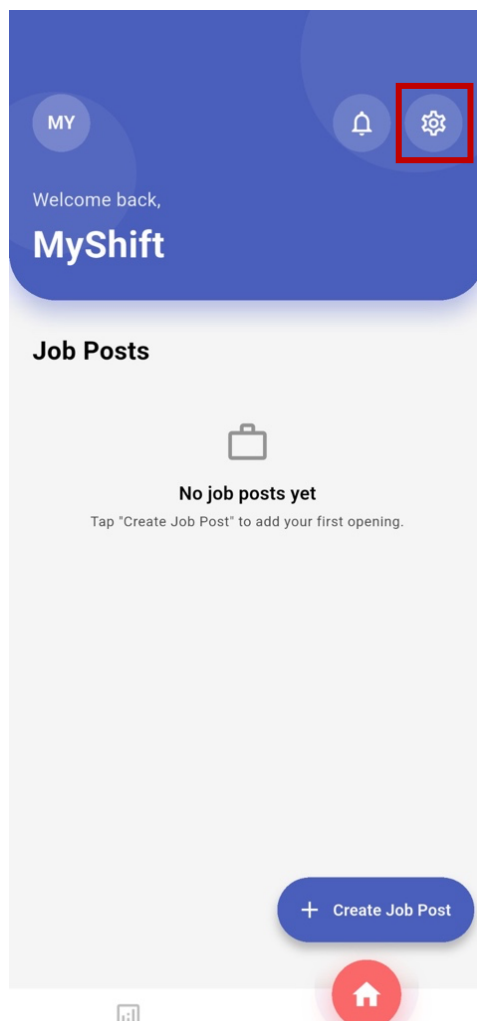

Figure 21: Company Home Page.

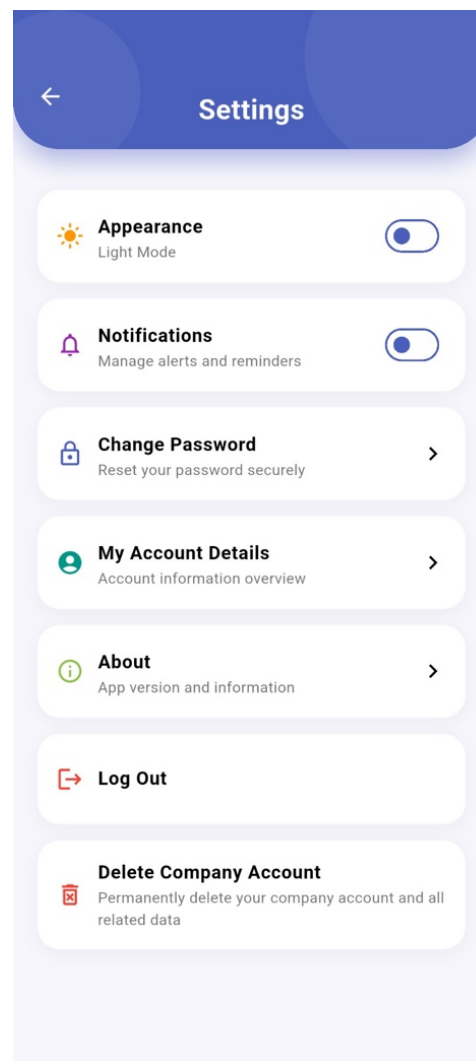

Figure 22: Settings Page.

4.2 Appearance Settings

Jadeer provides both Light Mode and Dark Mode to improve user experience and visual comfort based on user preference.

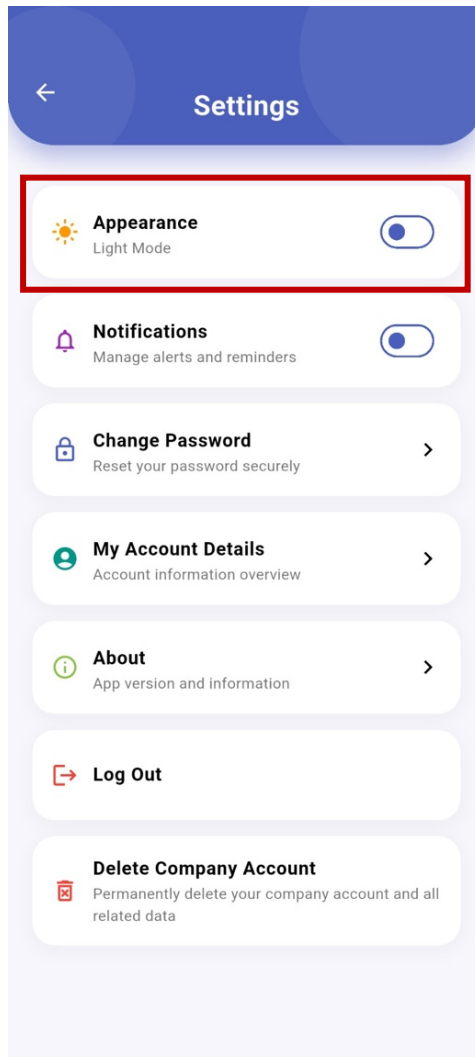

Figure 23: Light Mode Appearance Setting.

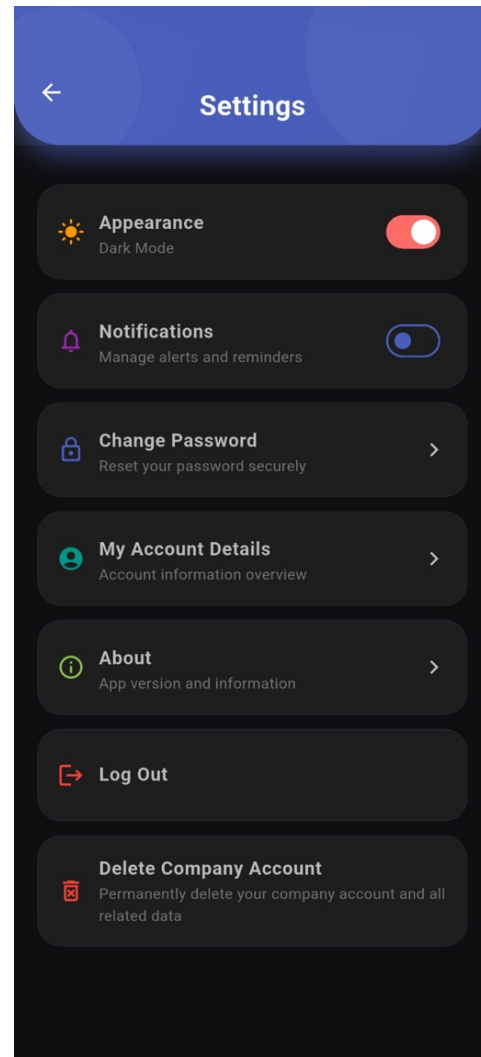

Figure 24: Dark Mode Appearance Setting.

4.3 Notification Settings

The Notifications setting enables users to manage application alerts and reminders according to their preferences.

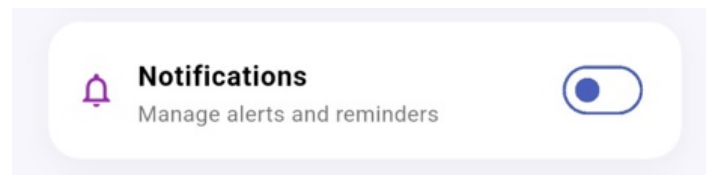

Figure 25: Notification Settings Option.

4.4 Change Password

Companies can change their account password through the “Change Password” option in the Settings page. To change the password, the user must:

- Enter the current password.
- Create a new password that meets the password requirements.
- Re-enter the new password for confirmation.

Once the password is updated successfully, a confirmation message will appear.

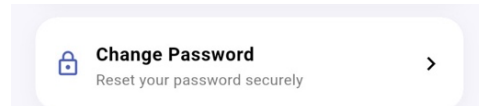

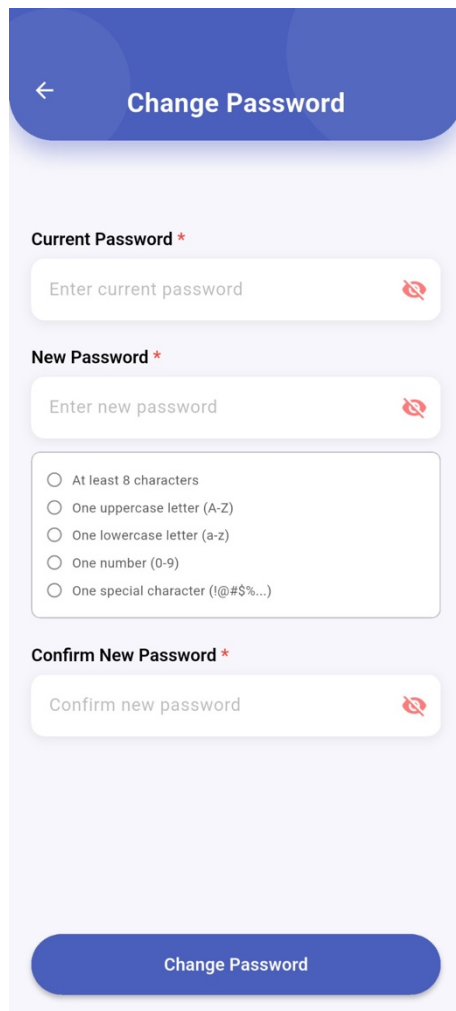

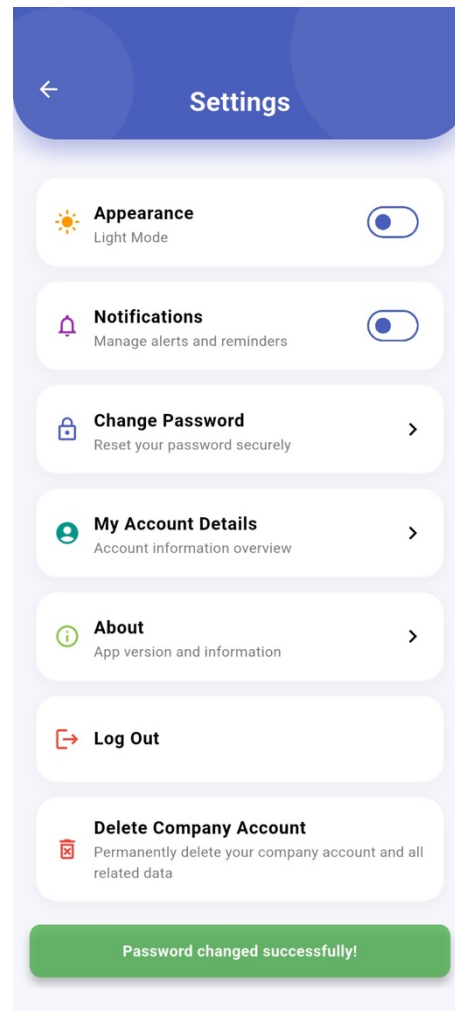

Figure28: Change Password Option.

The image shows the 'Change Password' page. It has a blue header with a back arrow and the title 'Change Password'. Below the header, there are three input fields: 'Current Password *', 'New Password *', and 'Confirm New Password *'. Each field has a placeholder text and a red eye icon to toggle visibility. Below the 'New Password *' field, there is a list of requirements: 'At least 8 characters', 'One uppercase letter (A-Z)', 'One lowercase letter (a-z)', 'One number (0-9)', and 'One special character (!@#\$%...)'. At the bottom, there is a blue button labeled 'Change Password'.

Figure 27: Change Password Page.

The image shows the 'Settings' page. It has a blue header with a back arrow and the title 'Settings'. Below the header, there are several settings options: 'Appearance' (Light Mode), 'Notifications' (Manage alerts and reminders), 'Change Password' (Reset your password securely), 'My Account Details' (Account information overview), 'About' (App version and information), 'Log Out', and 'Delete Company Account' (Permanently delete your company account and all related data). At the bottom, there is a green banner with the text 'Password changed successfully!'.

Figure 26: Password Changed Successfully Message.

4.5 My Account Details

Companies can access the “My Account Details” page to view their account information. The page displays the registered full name, company name, and registered email address. Companies can also edit their full name and save the updated information.

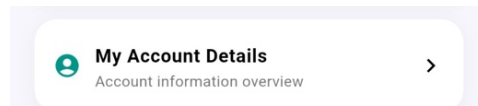

Figure 31: My Account Details.

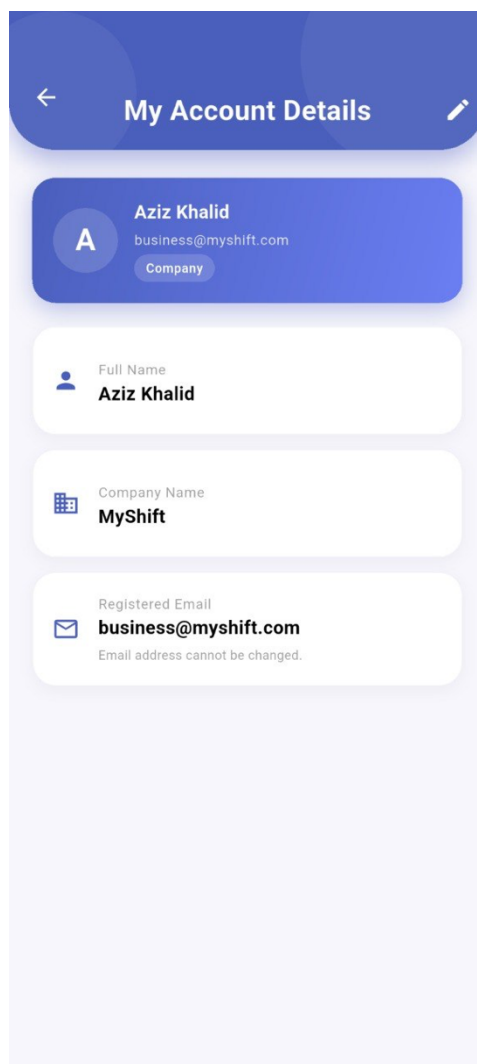

Figure 30: My Account Details Page.

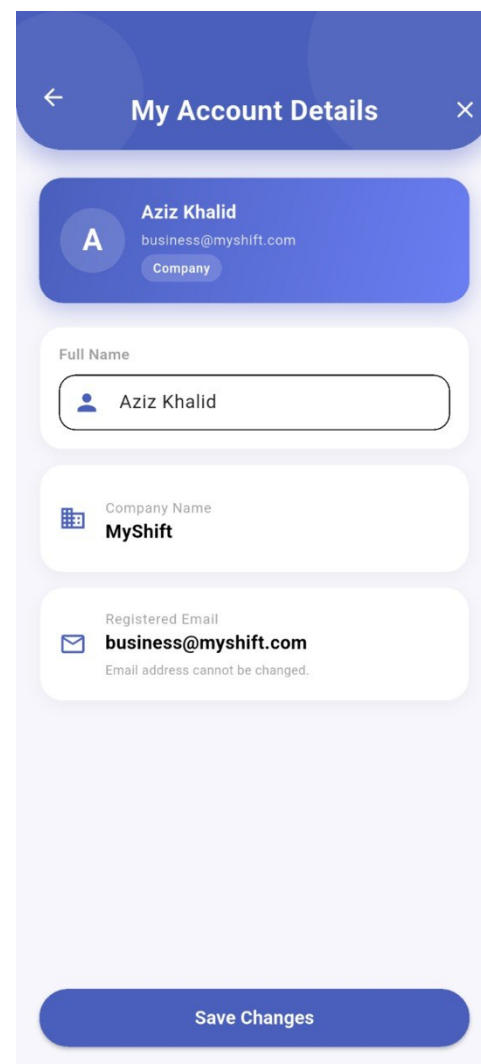

Figure 29: Editing Account Information and Saving Changes.

4.6 About Page

Companies can access the “About” page to view general information about the Jadeer application. The page displays the application version, a brief description of the system, development information, and contact details for inquiries or feedback.

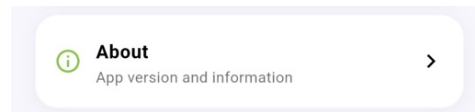

Figure 32: About Option.

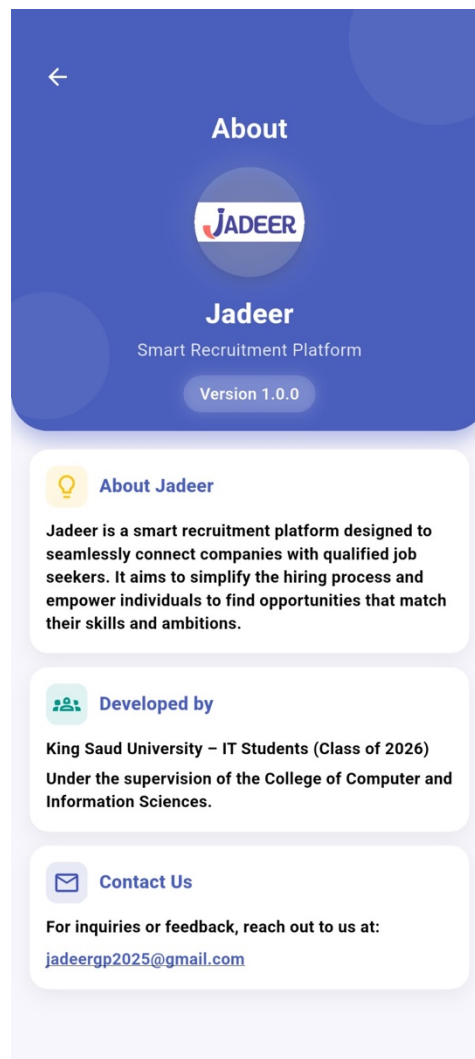

Figure 33: About Page.

4.7 Logging Out

Companies can log out from their accounts through the “Log Out” option in the Settings page. A confirmation message will appear before completing the logout process.

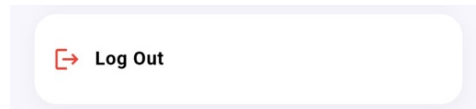

Figure 34: Log out Option.

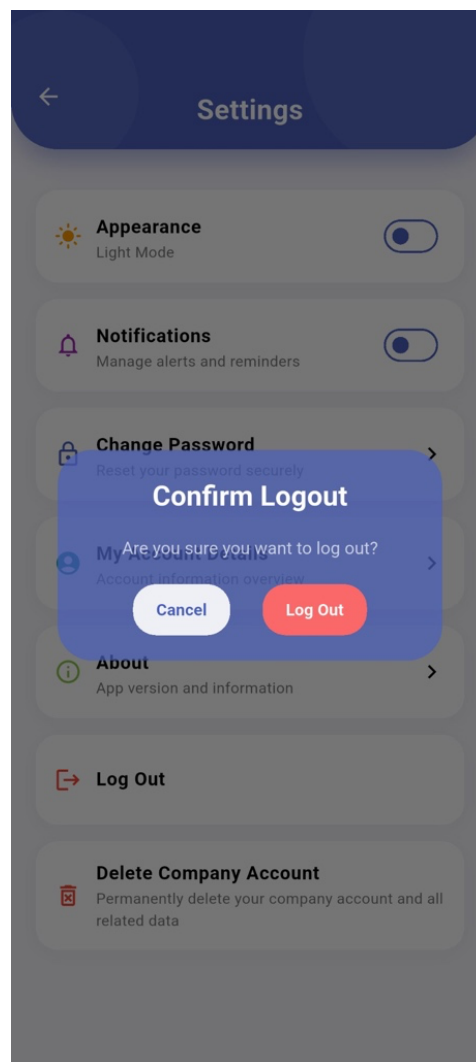

Figure 35: Logout Confirmation Message.

4.8 Delete Company Account

Companies can permanently delete their accounts through the “Delete Company Account” option in the Settings page. The system displays confirmation and warning messages before permanently deleting the account and all related data.

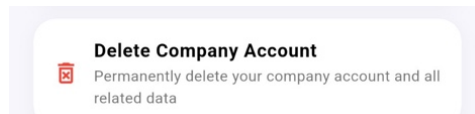

Figure 38: Delete Company Account Option.

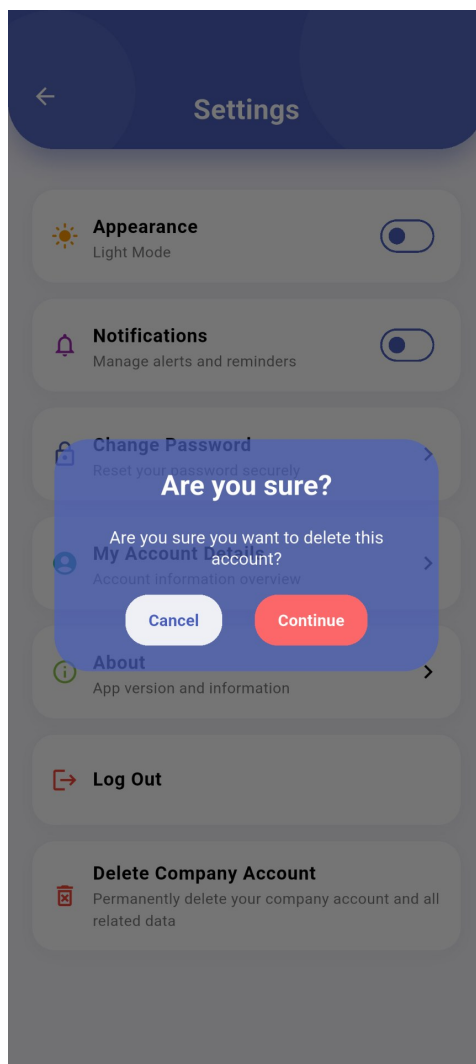

Figure 36: Delete Account Confirmation Message.

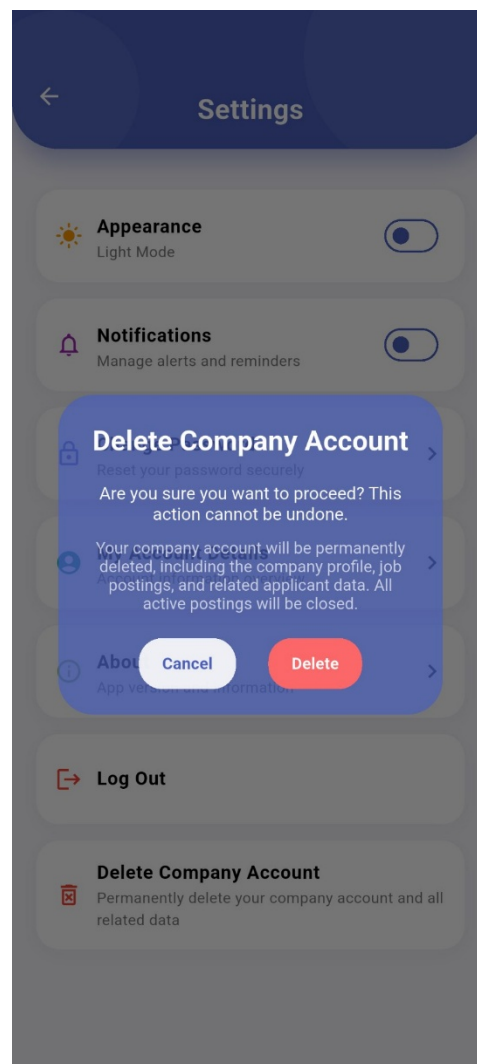

Figure 37: Permanent Deletion Warning Message.

5 Company Dashboard

5.1 Dashboard Overview

After logging into the system, company users will be directed to the Home Page, where they can access the main features.

The Dashboard page displays company information, Company job posts. Company users can also create new job opportunities through the “Create Job Post” button.

If there are no created job posts, a message indicating that there are currently no available job postings will be displayed.

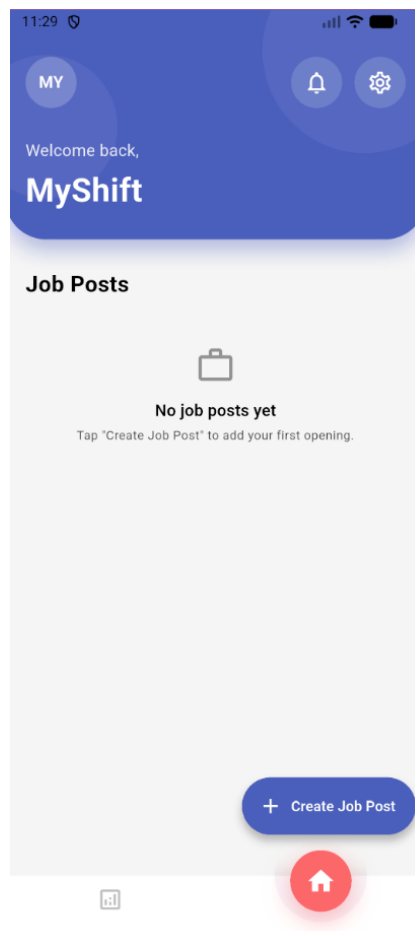

Figure 39: Company Dashboard Page

5.2 Navigation Bar

Companies can use the navigation bar located at the bottom of the page to move between different sections of the application; The navigation bar allows Companies to:

- Access the Home Page.
- Access reports and evaluation features.

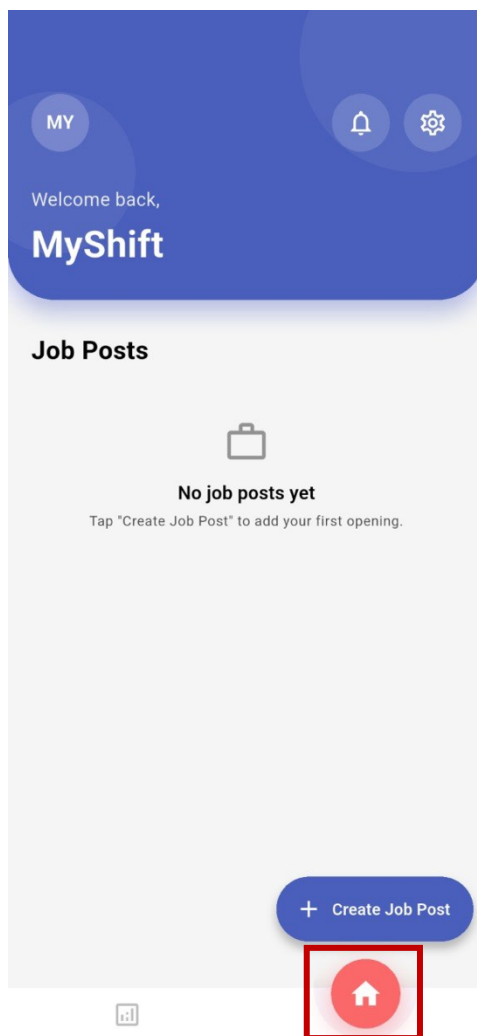

Figure 41: Navigation to Home Page.

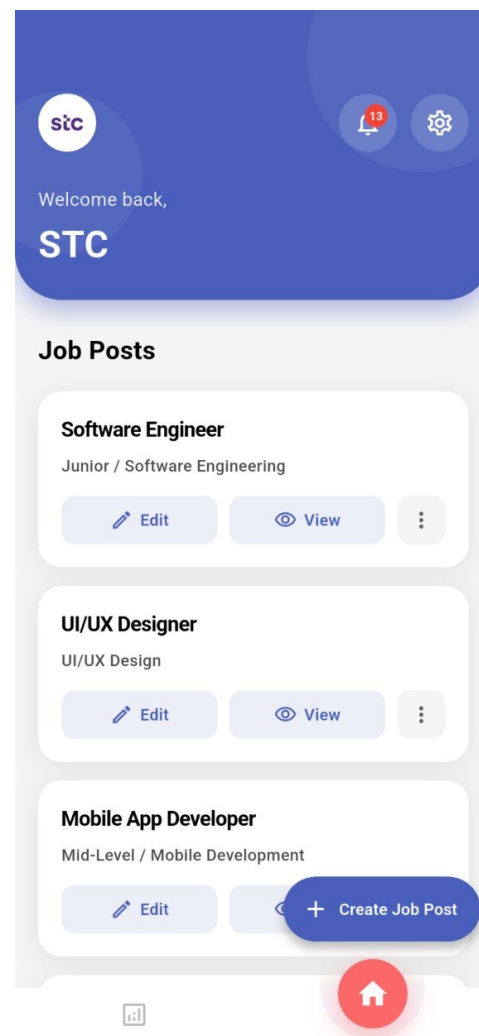

Figure 40: Home Page with Job Posts.

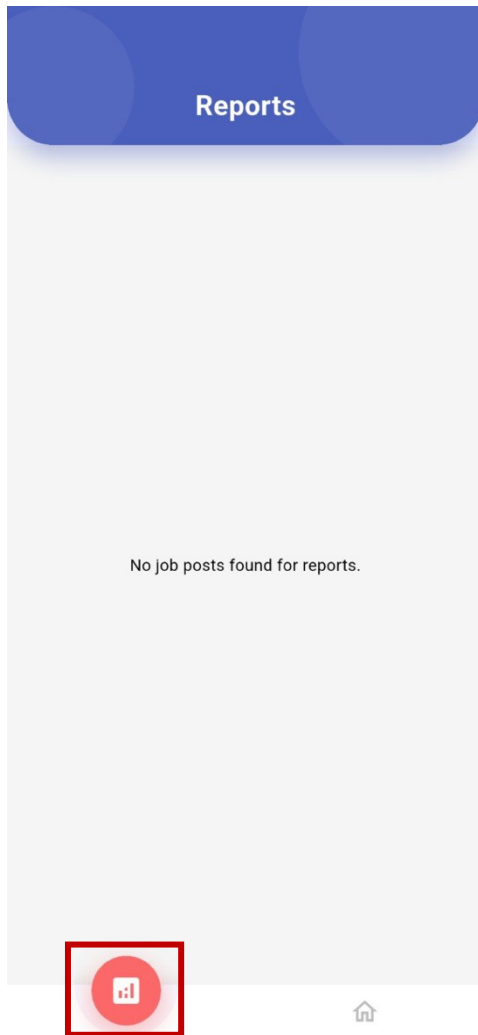

Figure 43: Navigation to Reports.

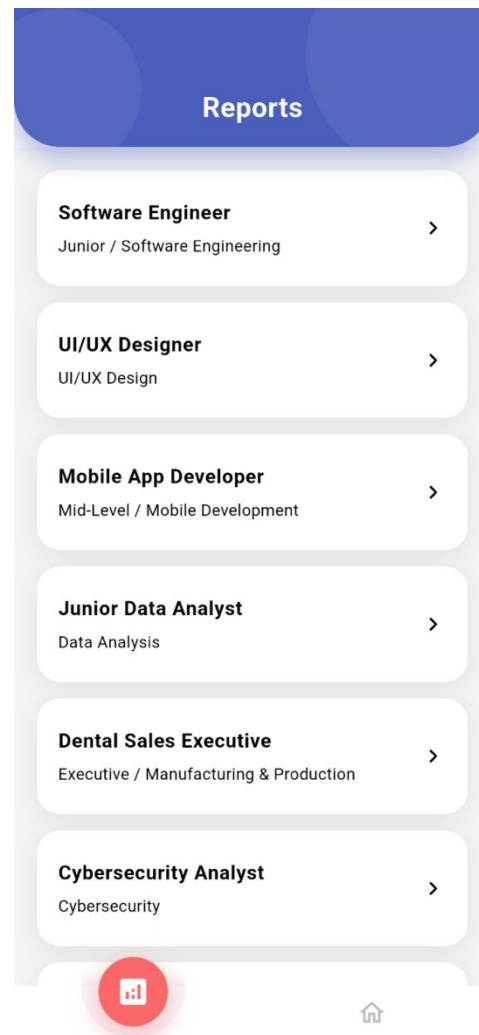

Figure 42: Reports Page Showing Available Reports.

5.3 Notifications

Company users can access notifications by tapping the notification icon located at the top-right corner of the Dashboard page.

The Notifications page displays updates related to applications and other recruitment activities.

If there are no available notifications, the system will display a message indicating that there are currently no notifications and future updates will appear on this page.

Figure 44: Notification icon.

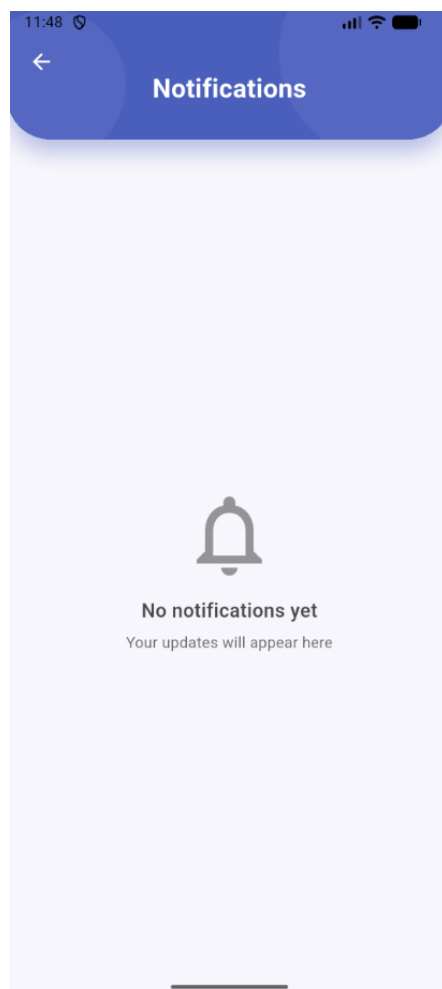

Figure 46: Notifications Page with No Available Notifications.

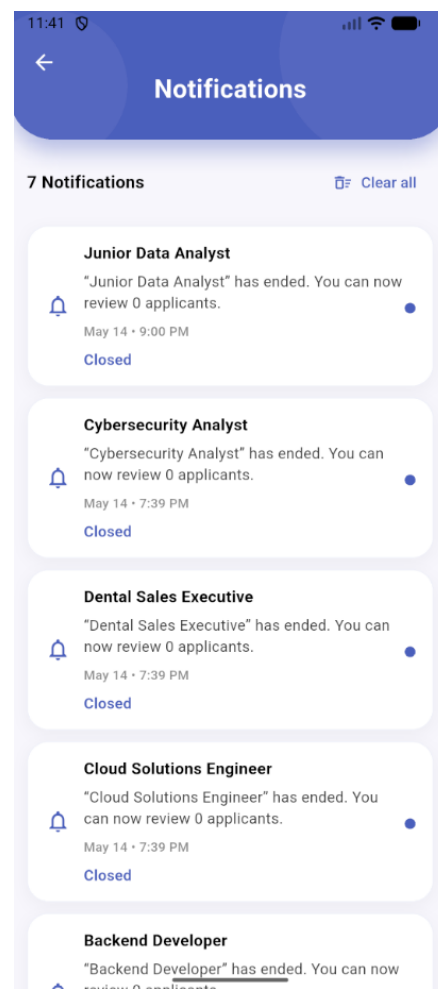

Figure 45: Notifications Page Showing Available Updates.

Company Profile Management

5.4 View Company Profile

Companies can access the Company Profile page by tapping the profile icon located on the Home Page. The Company Profile page displays company details and profile sections that can be managed or updated. The page includes:

- Company logo and company name.
- Company Information section.
- Contact Information section.

Company users can access these sections to view profile information and manage company details.

Figure 47: Profile Icon.

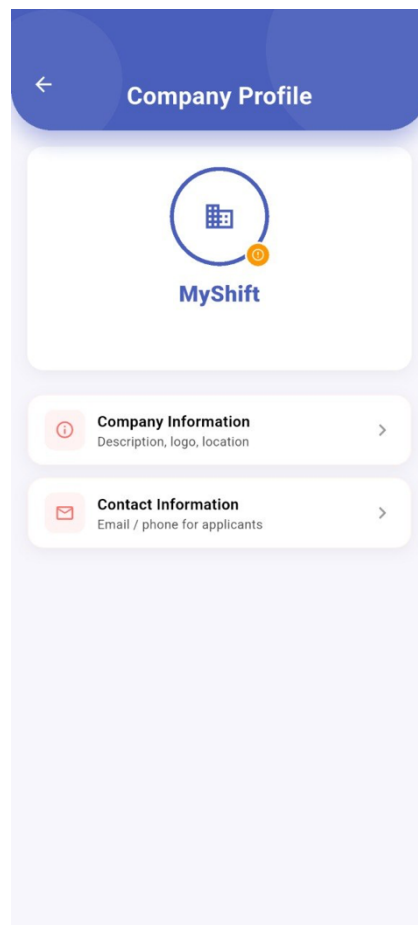

Figure 48: Company Profile Page.

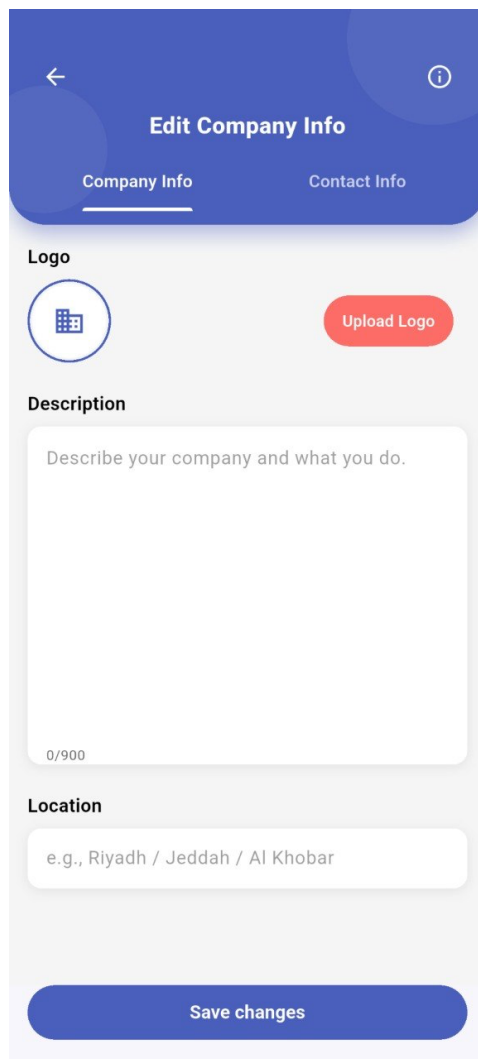

5.5 Edit Company Information

5.5.1 Company Info Tab

Company users can edit company information by accessing the Company Profile page and selecting the Company Info section.

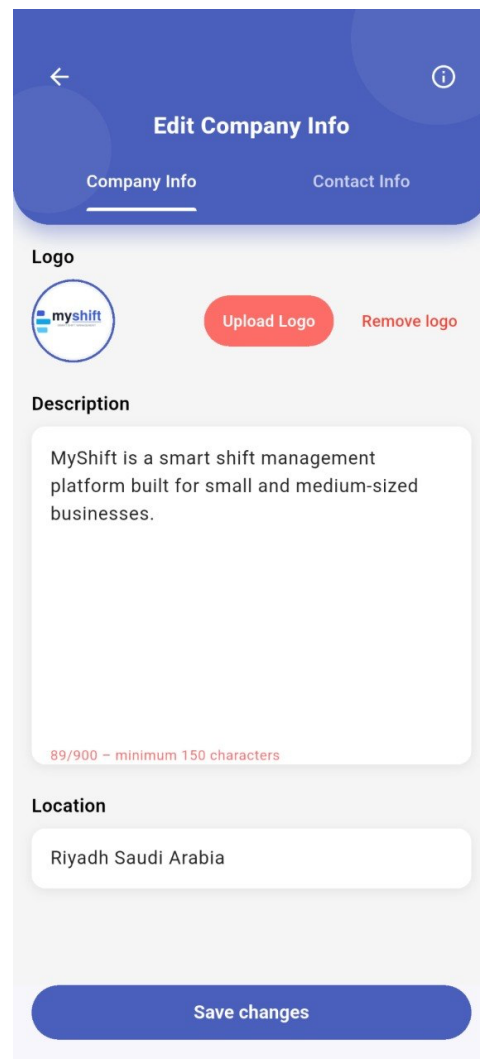

The Company Information section allows companies to:

- Upload or update the company logo.
- Add or modify the company description. The description must be between 150 and 900 characters.
- Update company location details.

The screenshot shows the 'Edit Company Info' screen with the 'Company Info' tab selected. It features a 'Logo' section with a placeholder icon and an 'Upload Logo' button. The 'Description' section has a text area with the placeholder 'Describe your company and what you do.' and a character count '0/900'. The 'Location' section has a text input field with the placeholder 'e.g., Riyadh / Jeddah / Al Khobar'. A 'Save changes' button is at the bottom.

Figure 49: Company Info tab in its default empty state.

The screenshot shows the 'Edit Company Info' screen with the 'Company Info' tab selected. It features a 'Logo' section with a 'myshift' logo and 'Upload Logo' and 'Remove logo' buttons. The 'Description' section has a text area with the text 'MyShift is a smart shift management platform built for small and medium-sized businesses.' and a character count '89/900 - minimum 150 characters'. The 'Location' section has a text input field with the text 'Riyadh Saudi Arabia'. A 'Save changes' button is at the bottom.

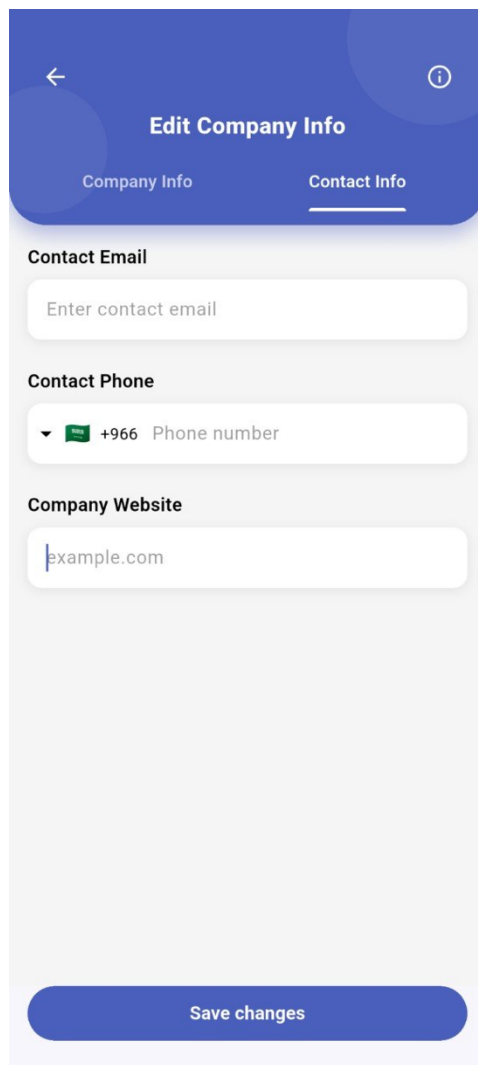

Figure 50: Company Info tab with filled details and description validation warning.

5.5.2 Contact Info Tab

Company users can edit contact information by selecting the Contact Info section from the Company Profile page.

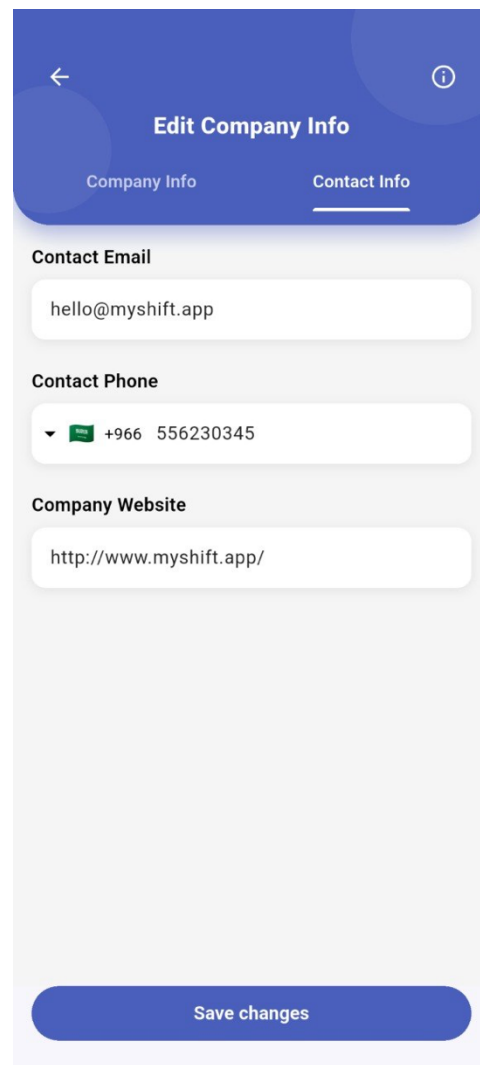

The Contact Information section allows company users to update:

- Contact email address, which must follow a valid email format.
- Contact phone number, which must use an accepted format.
- Company website, which must contain a valid URL.

The screenshot shows the 'Edit Company Info' screen with the 'Contact Info' tab selected. The form contains three input fields: 'Contact Email' with the placeholder 'Enter contact email', 'Contact Phone' with a dropdown menu showing '+966' and 'Phone number', and 'Company Website' with the placeholder 'example.com'. A 'Save changes' button is at the bottom.

Figure 51: Contact Info tab in its default empty state.

The screenshot shows the 'Edit Company Info' screen with the 'Contact Info' tab selected. The form contains three input fields: 'Contact Email' with the value 'hello@myshift.app', 'Contact Phone' with a dropdown menu showing '+966' and '556230345', and 'Company Website' with the value 'http://www.myshift.app/'. A 'Save changes' button is at the bottom.

Figure 52: Contact Info tab with filled details

5.5.3 Profile Completion Requirements

Companies with active job posts are required to maintain a complete company profile. The system considers a profile complete when:

- A company logo is uploaded.
- The description is at least 150 characters (max 900).
- A location is set.
- At least one valid contact method is provided, either a contact email or a phone number with a country code.

If a required field is missing or contains invalid information, the system will display a warning message and changes will not be saved until all requirements are met.

After entering valid information, company users can save updates by tapping the Save changes button.

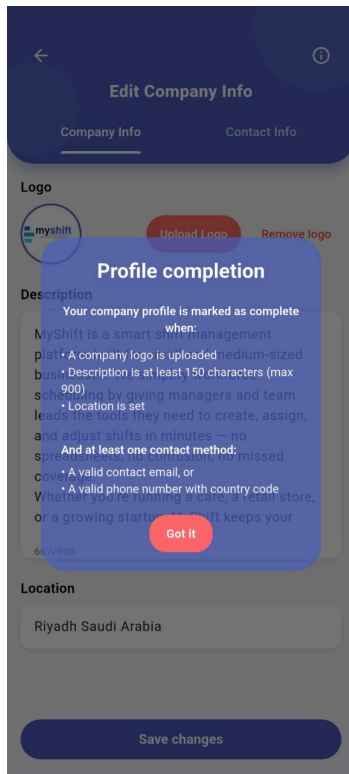

Figure 55: Profile completion requirements popup.

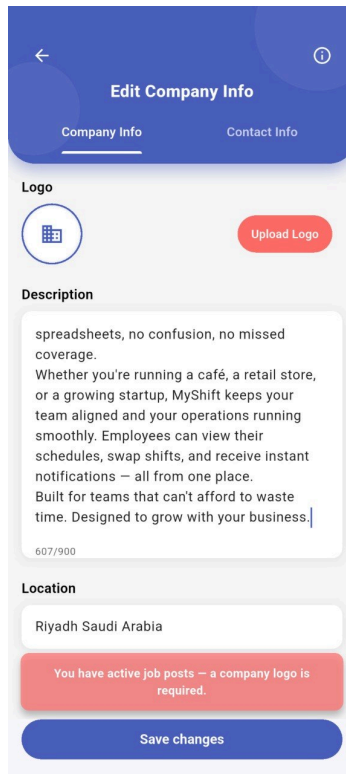

Figure 54: Warning message when no logo is uploaded.

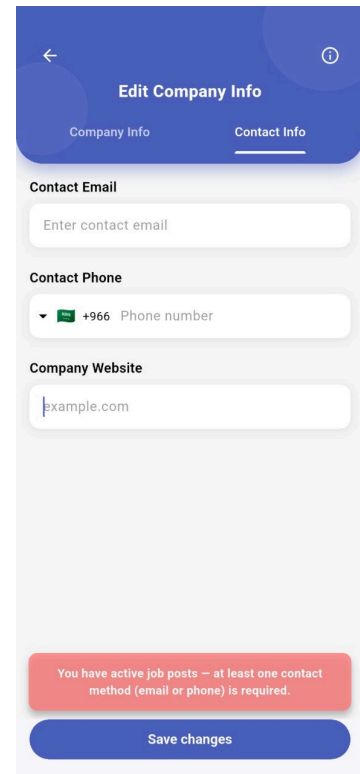

Figure 53: Warning message when no contact method is provided.

6 Job Management

6.1 Create A Job Post

Companies can create a new job posting by tapping the “Create Job Post” button located on the Home Page.

The Create Job Posting page allows companies to enter job details required for publishing a job opportunity.

Companies can enter:

- Job title.
- Position information.
- Specialty.
- Job description.
- Requirements.
- Start date.
- End date.

All fields are required except Position, which is optional.

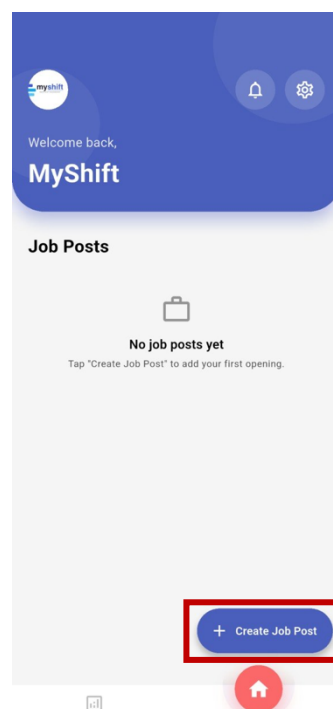

Figure 56: Create Job Post button.

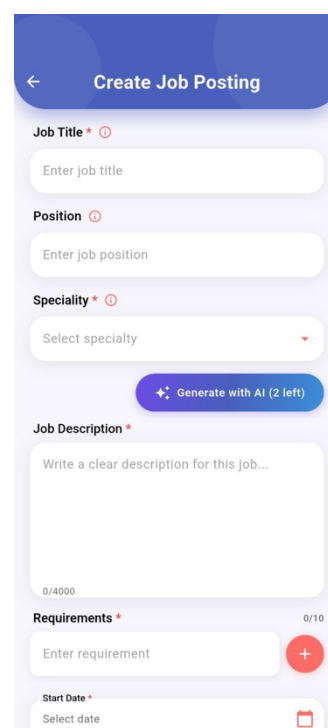

Figure 57: Create Job Posting Page.

6.1.1 Job Title

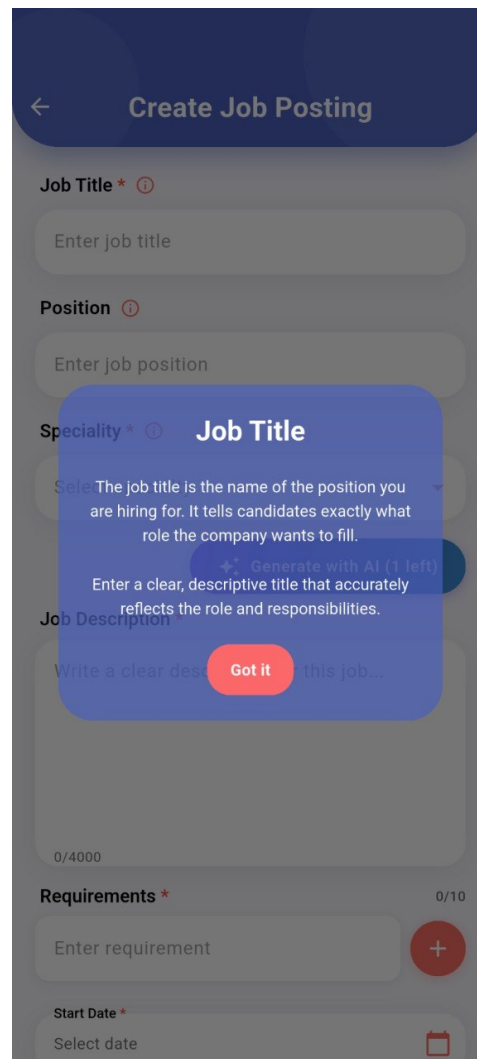

The Job Title field requires companies to enter the name of the role they are hiring for. A clear and descriptive title helps candidates understand exactly what position is being offered.

Job Description *

As a Senior Product Support Specialist, you will play a pivotal role in ensuring our customers derive maximum value from our products. This position is essential for fostering strong relationships with clients, resolving complex issues, and driving customer satisfaction. You will be the primary point of contact for escalated inquiries, leveraging your expertise to provide solutions and insights that enhance the user experience. Your ability to communicate effectively and empathize with customers will not only help resolve their concerns but also contribute to shaping our product offerings based on real-world feedback. Success in this role is measured by your ability to cultivate customer loyalty, identify opportunities for product improvements, and lead initiatives that elevate the support function.

Key responsibilities in this role include leading the troubleshooting and resolution of advanced product issues, ensuring timely and effective responses to customer inquiries while maintaining a high standard of service quality. You will develop and implement training programs for junior support staff, equipping them with the skills

6.2 Job Questions

After creating a job posting, companies are directed to the Job Questions page. This page displays AI-generated interview questions based on the job details entered. Companies can review, edit, and add questions before the posting goes live.

6.2.1 Viewing Questions

The Job Questions page displays all interview questions generated based on the entered job details. Each question is categorized as either Technical or Psychometric. The system supports a maximum of 10 questions per job post, with up to 5 questions of each type.

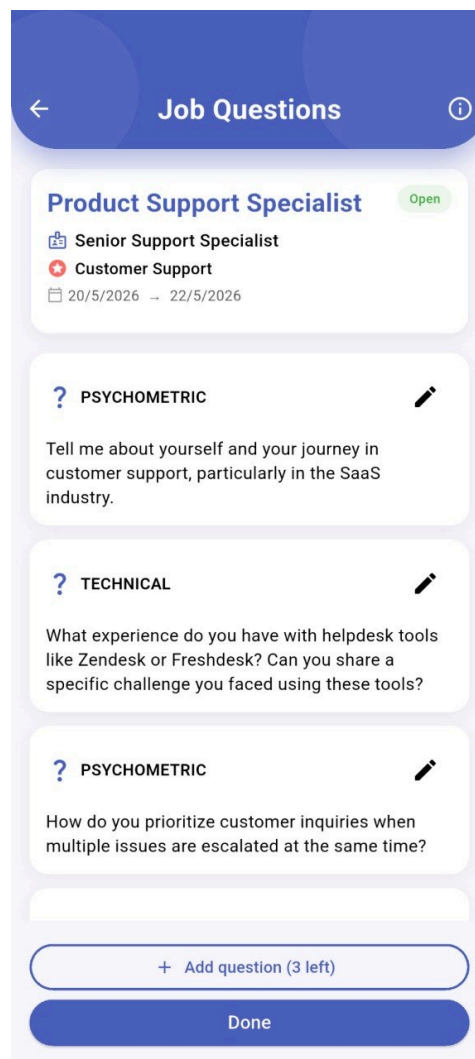

Figure 71: Job Questions page with AI-generated questions.

6.2.2 Editing Questions

Companies can edit any existing question by tapping the edit icon next to it. A popup will appear allowing the company to modify the question text. Changes are saved by tapping Save.

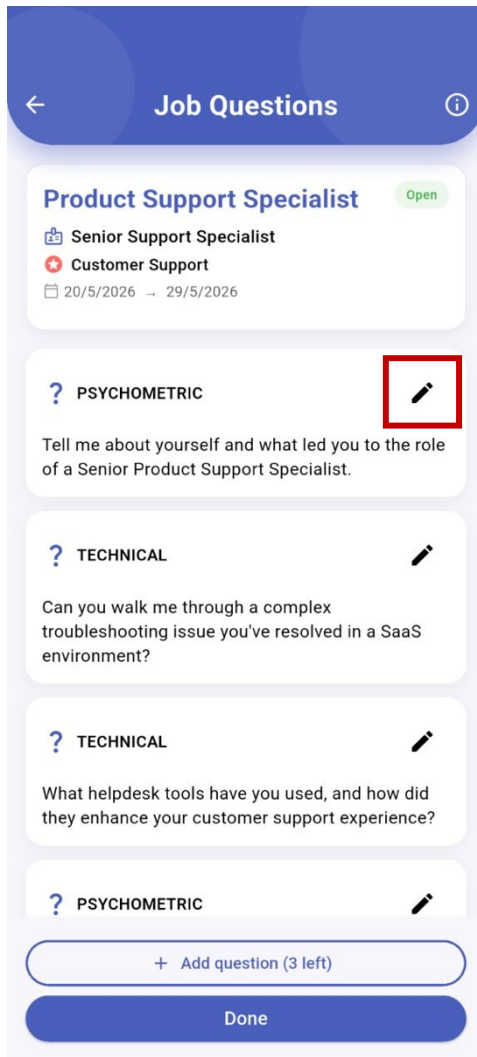

Figure 72: Edit icon.

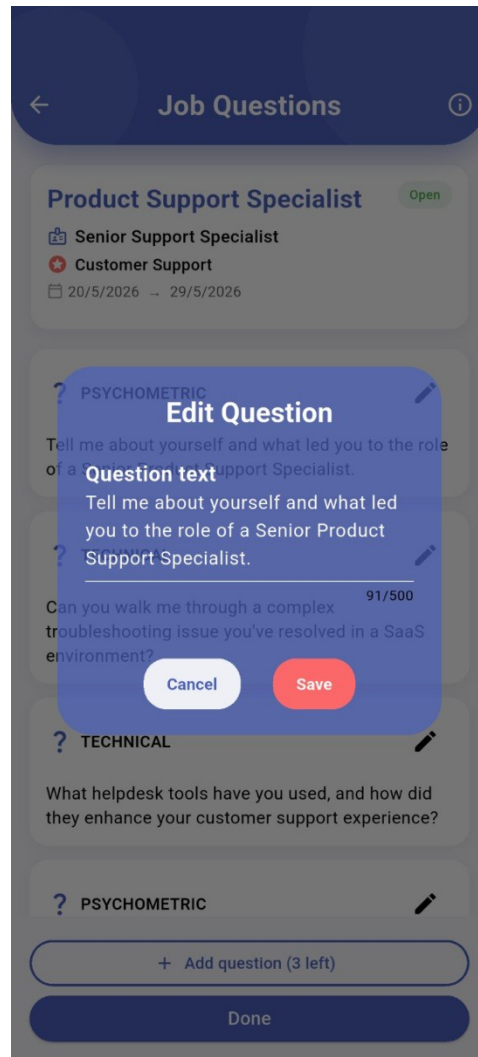

Figure 73: Edit Question popup.

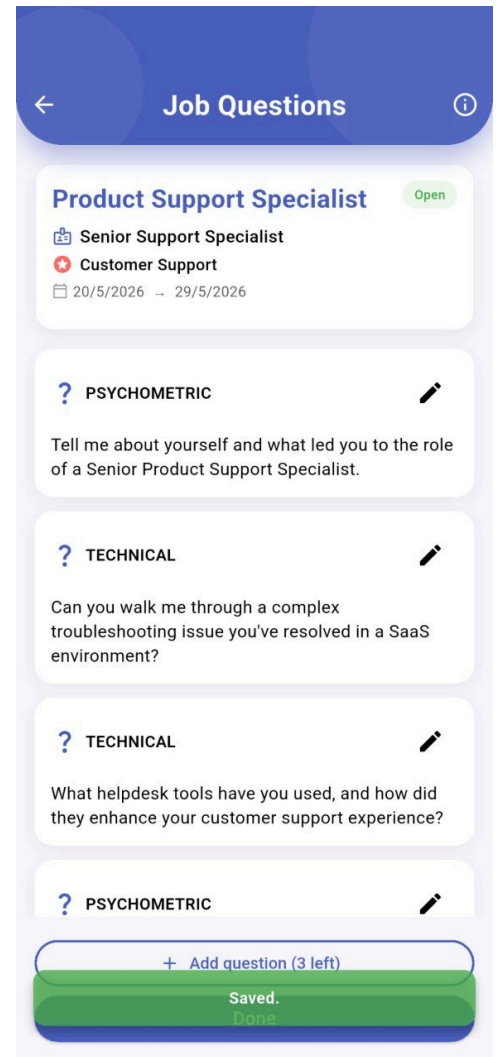

Figure 74: Save Edited Successfully Message.

6.2.3 Adding and Removing Questions

Companies can add up to 3 additional questions by tapping the Add Question button. When adding a question, companies must enter the question text and select its type, either Technical or Psychometric. Each question must be at least 20 characters and no more than 500 characters.

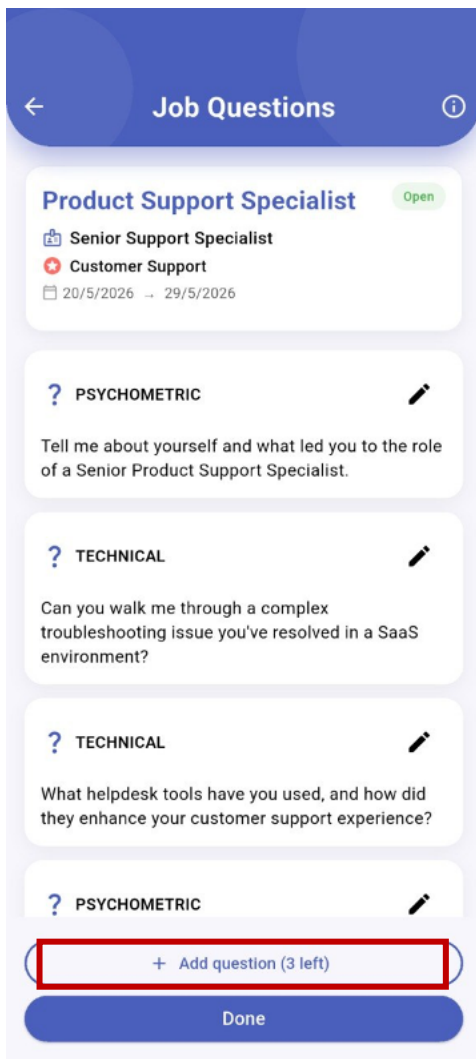

Figure 77: Add question button.

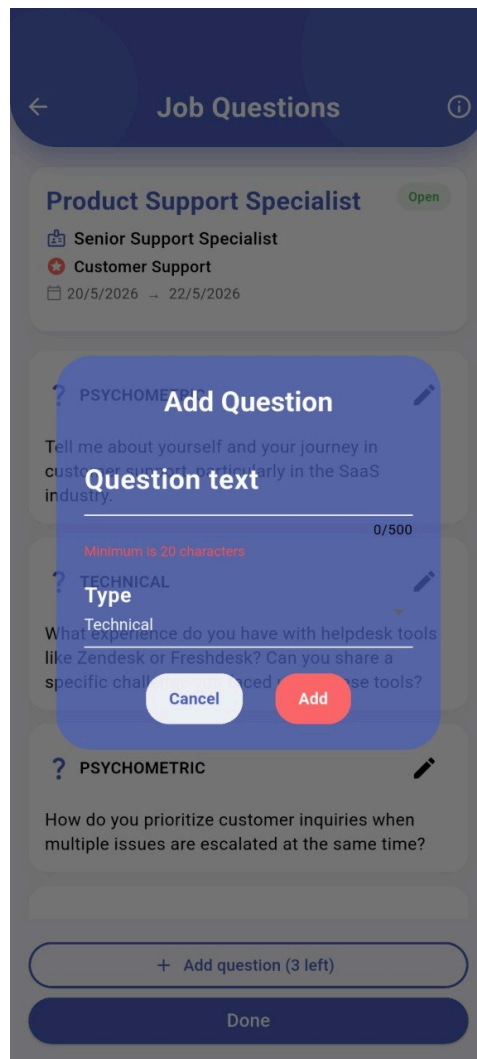

Figure 76: Add question popup with question text and type fields.

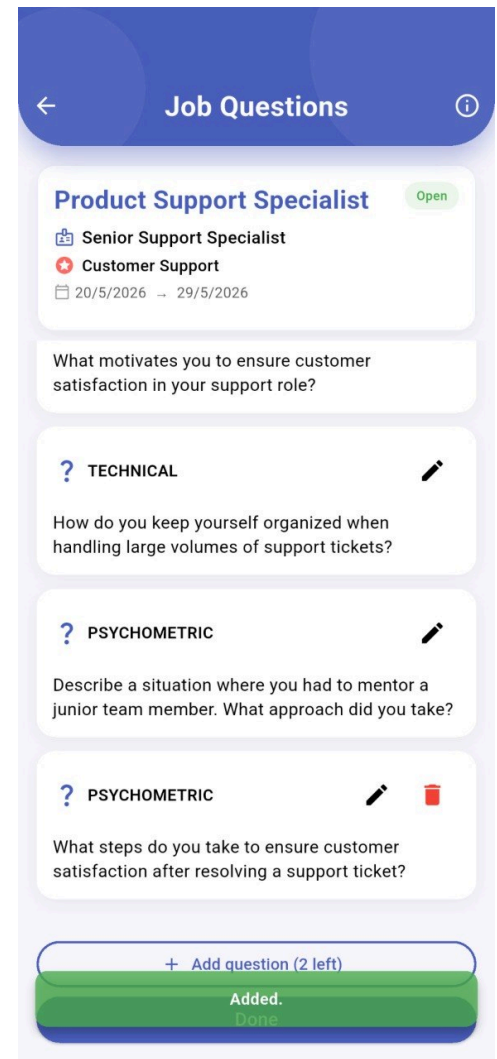

Figure 75: Added Successfully Message.

Added questions can be removed by tapping the delete icon next to them.

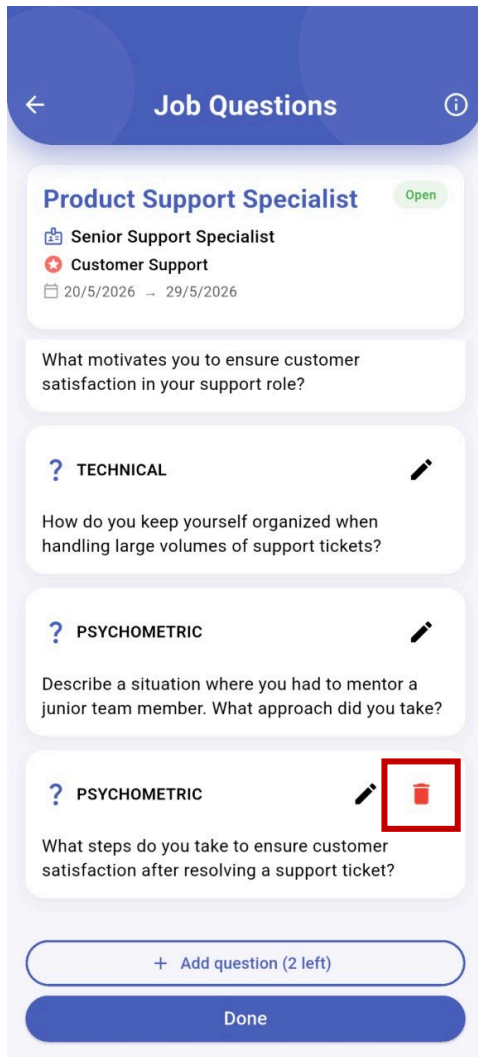

Figure 78: Delete icon.

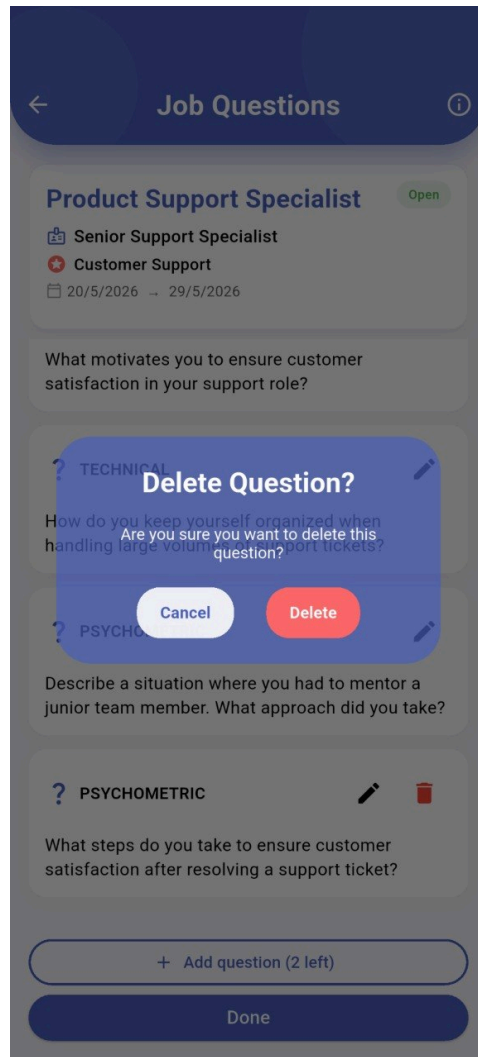

Figure 80: Delete Question popup.

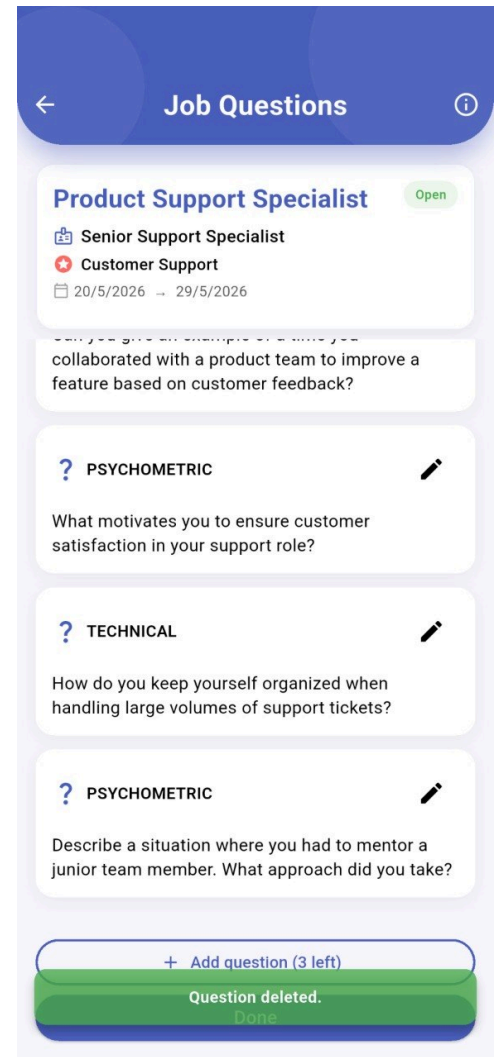

Figure 79: Deleted question Successfully Message.

6.2.4 Confirming and Publishing

Once all questions are reviewed, tapping Done displays a confirmation popup informing the company that the job post and its questions will be locked and cannot be edited after posting. Companies must tap Post & Lock to confirm and publish the job posting. A success message is displayed on the Dashboard once the job post is published successfully.

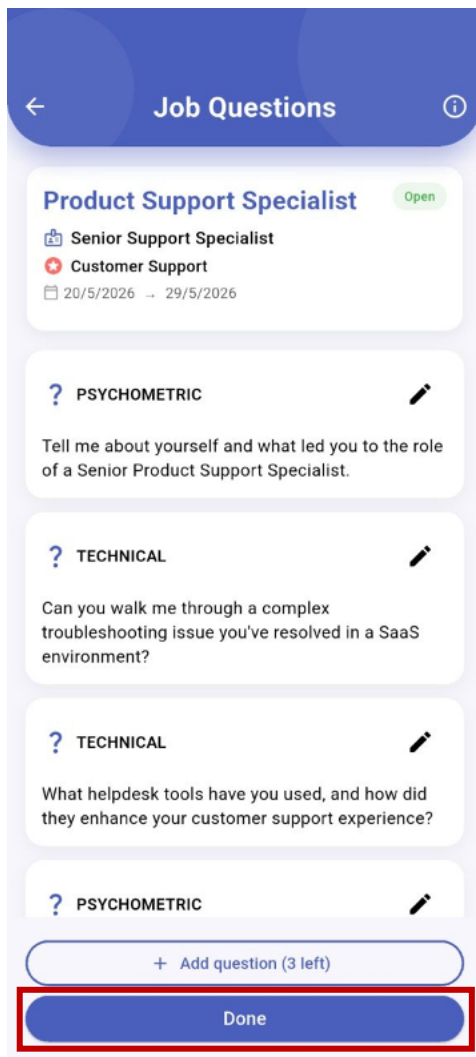

Figure 81: Done button.

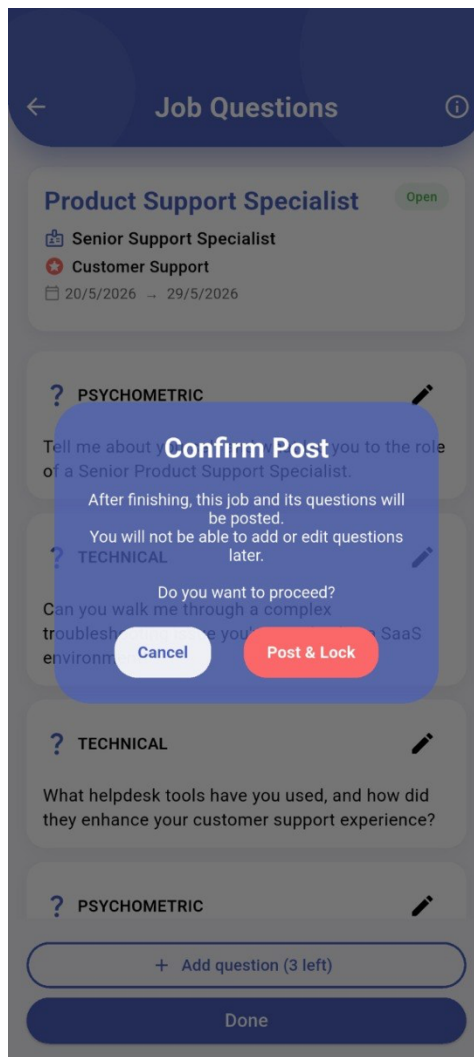

Figure 82: Confirm Post popup before publishing.

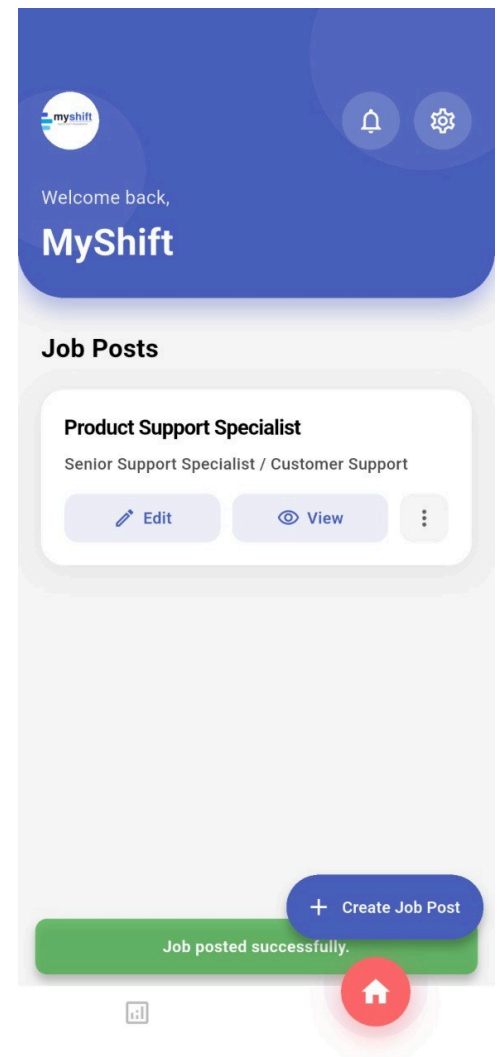

Figure 83: Dashboard showing success message after job post is published.

6.3 Edit Job Post

Company users can edit existing job postings by tapping the “Edit” button displayed on the Dashboard page.

The system allows companies to update editable job information, such as application dates.

After modifying information, companies can save the changes. If the update is successful, a confirmation message will appear and the new information will be reflected in the job posting.

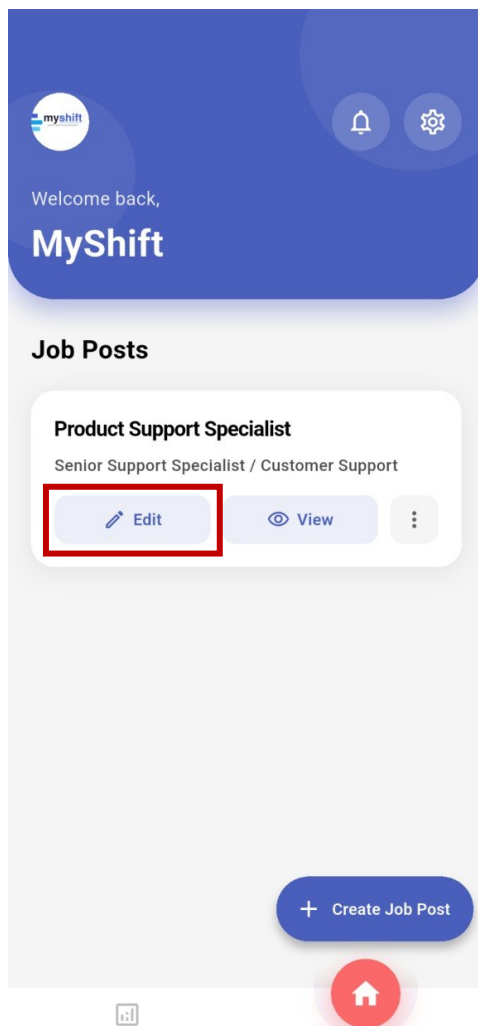

Figure 84: Existing Job Post with Edit Option.

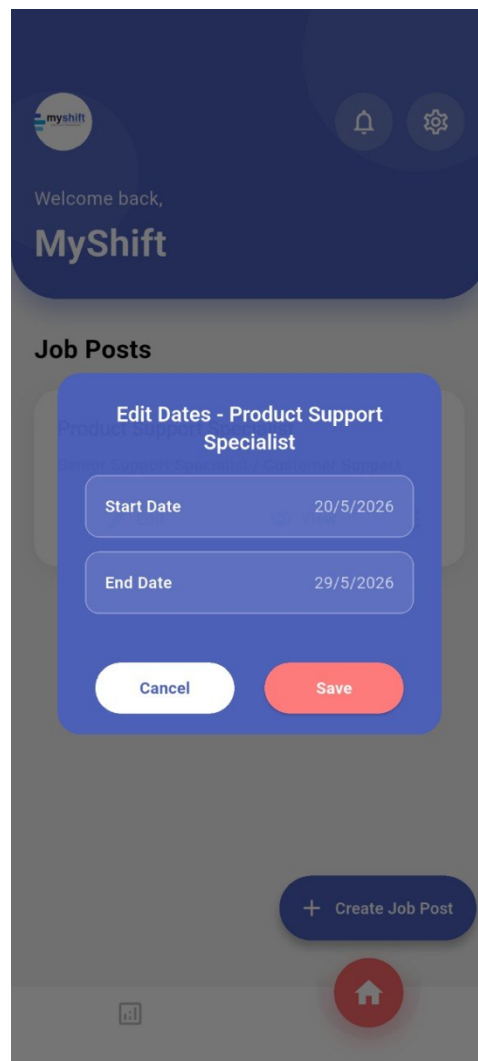

Figure 86: Edit Job Dates Window.

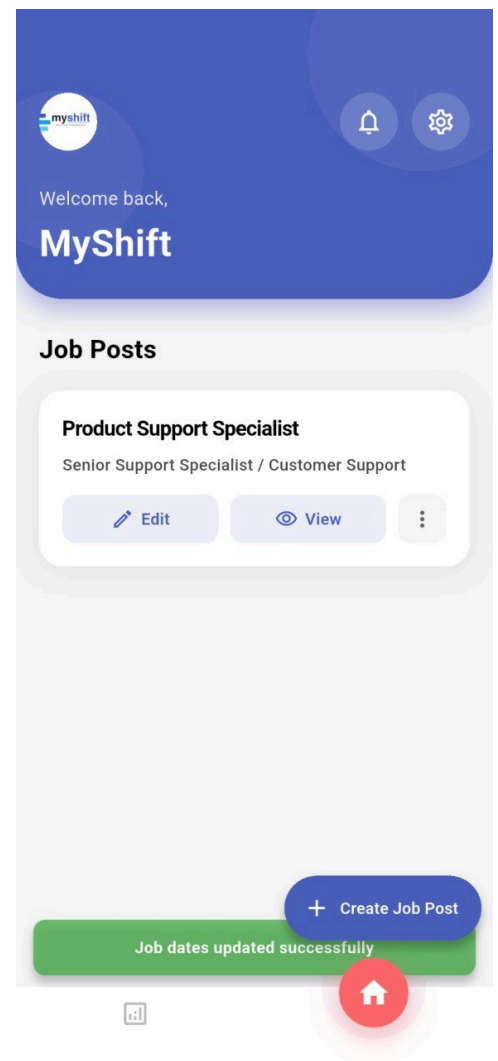

Figure 85: Job dates updated success message.

6.4 View Job Post

Companies can view a published job post by tapping the View button displayed beside each job post on the Dashboard. This opens the Job Questions page in read-only mode, displaying all interview questions associated with the posting. Questions cannot be edited or modified after the job post has been published.

Tapping the arrow button on the Job Questions page navigates to the Job Details page, where companies can view the full job information including the application period, job description, and requirements.

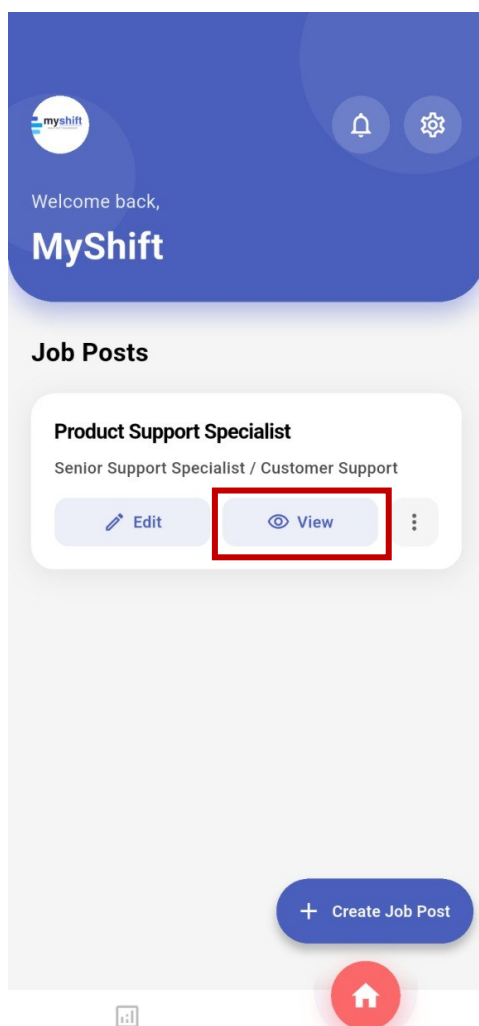

Figure 87: Dashboard showing the View button on a job post.

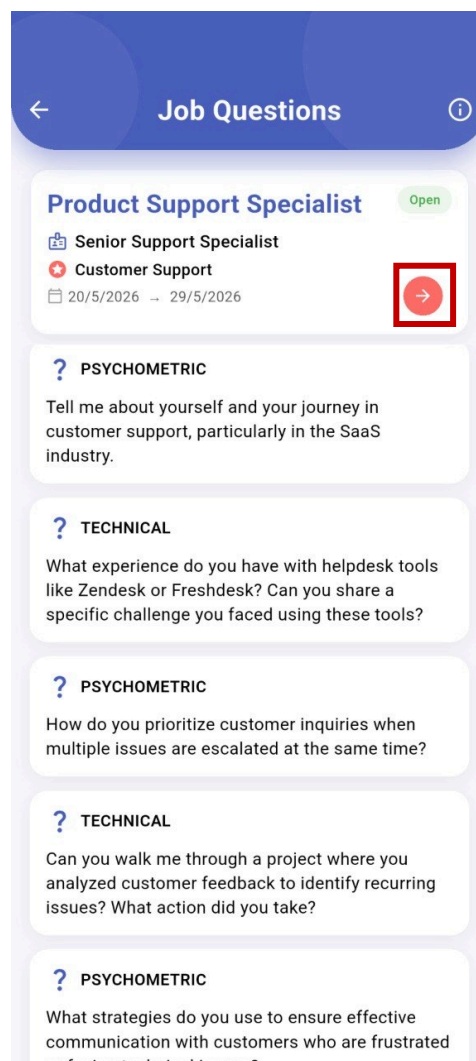

Figure 88: Job Questions page in read-only mode after publishing.

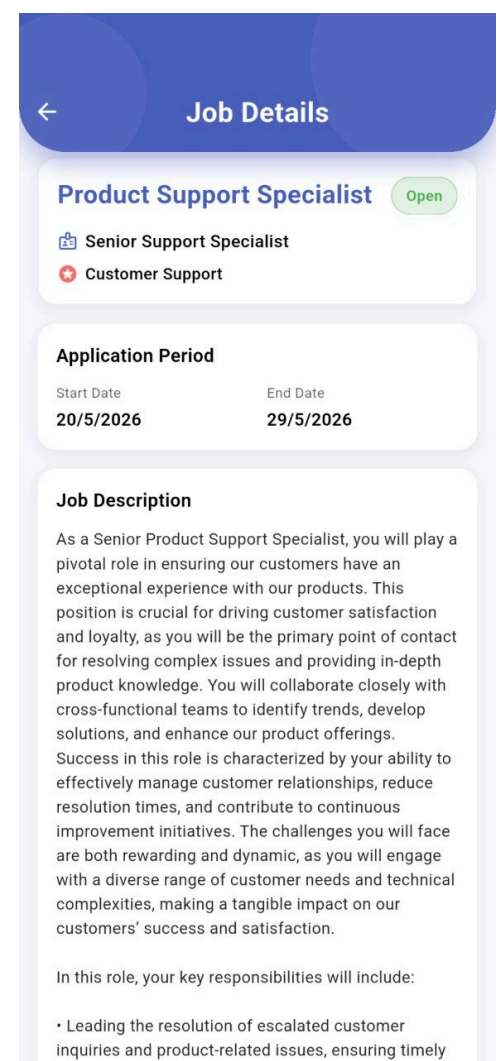

Figure 89: Job Details page showing full job information.

6.5 Close And Reopen Job Posts

Companies can manage job availability by accessing the job options menu displayed beside each job post. From this menu, companies can close or reopen a job posting at any time.

Selecting Close Job stops the posting from accepting new applications and changes its status to Closed.

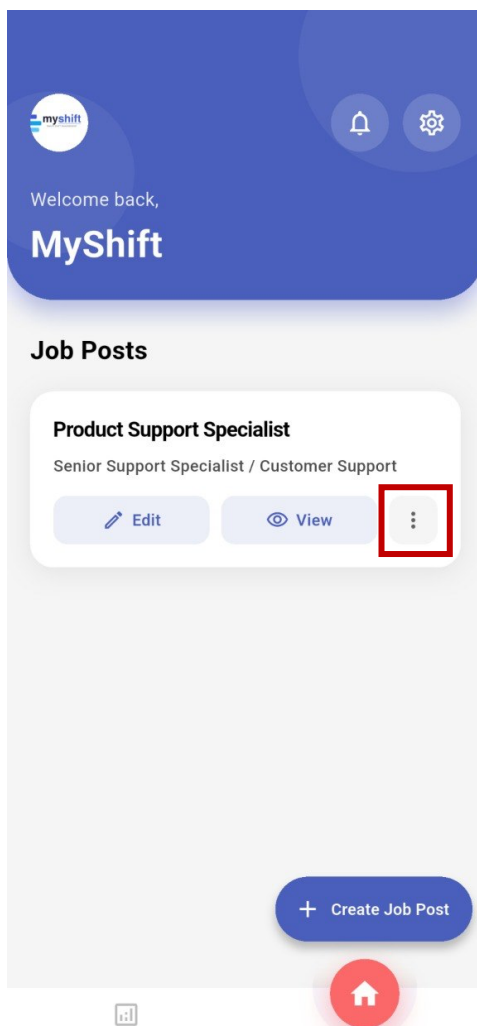

Figure 90: Job post options menu button.

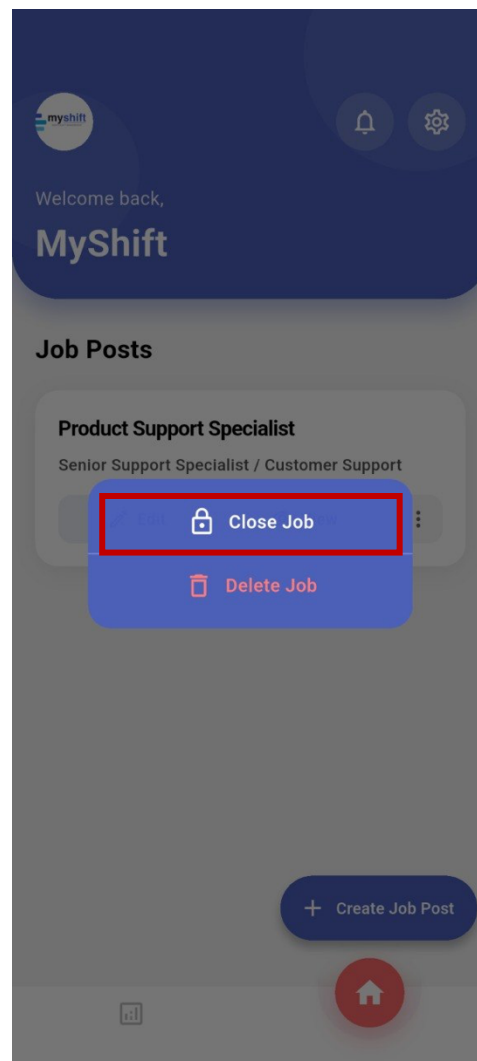

Figure 92: Close Job Option.

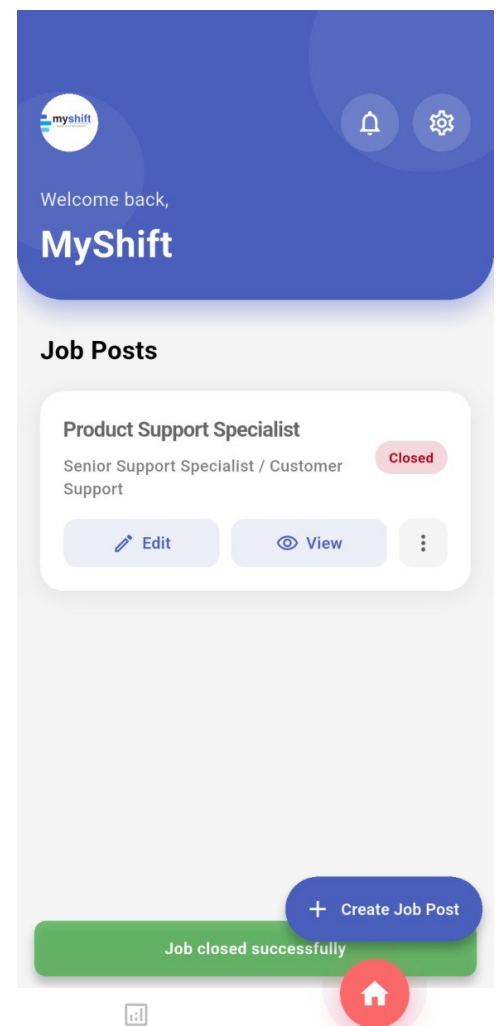

Figure 91: Job Closed Successfully.

Closed job posts remain visible in the Dashboard and can be reopened later if needed. When a job is reopened, the system restores its availability and allows applicants to submit applications again.

A confirmation message is displayed after successfully closing or reopening a job posting.

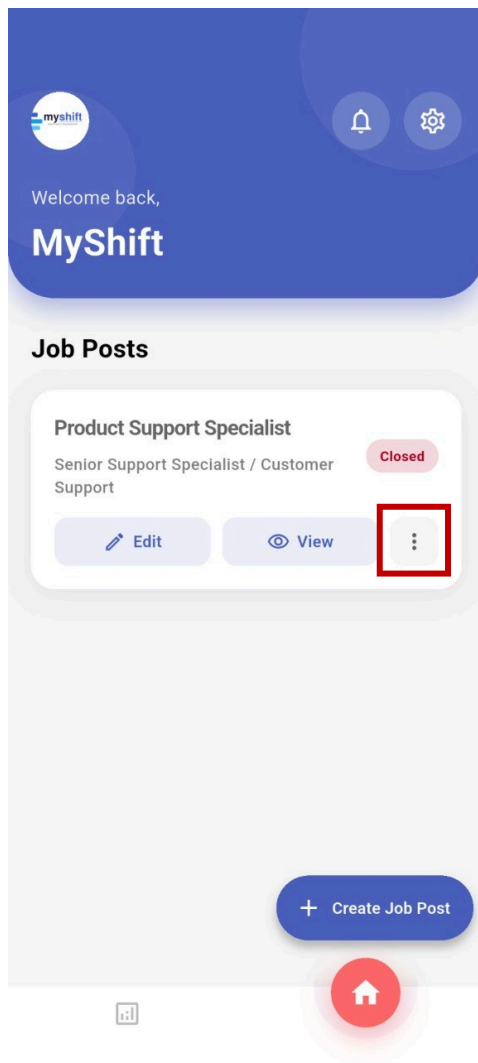

Figure 95: Closed Job options menu button.

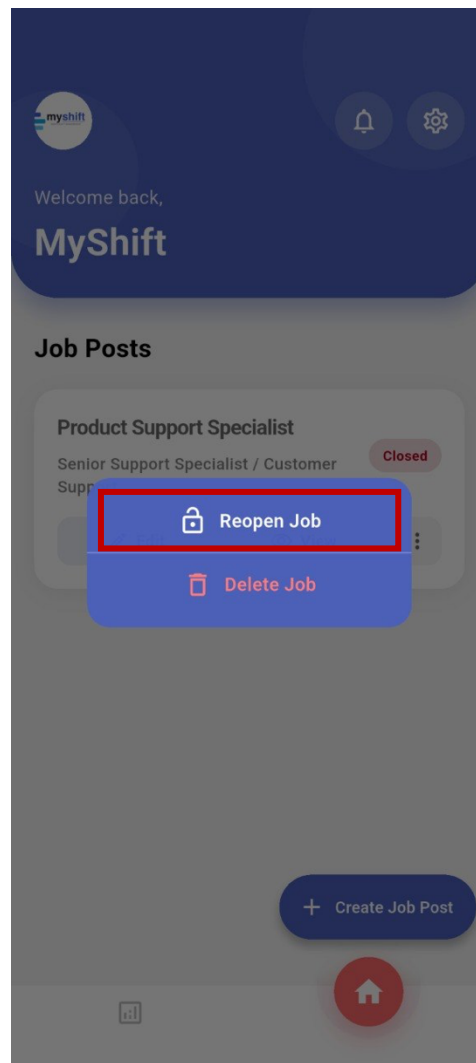

Figure 94: Reopen Job Option.

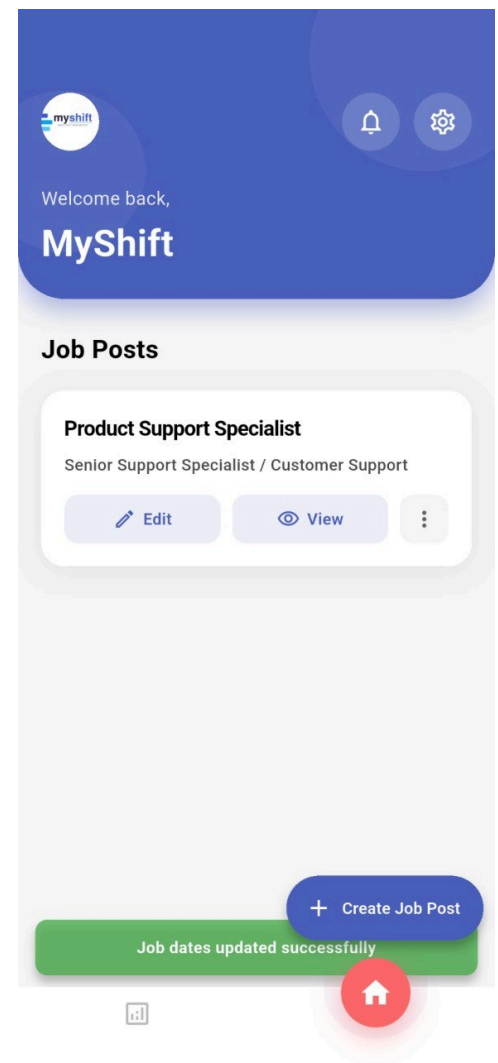

Figure 93: Job Reopened Successfully.

6.6 Delete Job Posts

Company users can permanently remove job postings by selecting the Delete Job option from the job management menu.

Before deleting a job post, the system displays a confirmation message to prevent accidental deletion.

If the deletion is confirmed, the selected job posting will be permanently removed and will no longer be available.

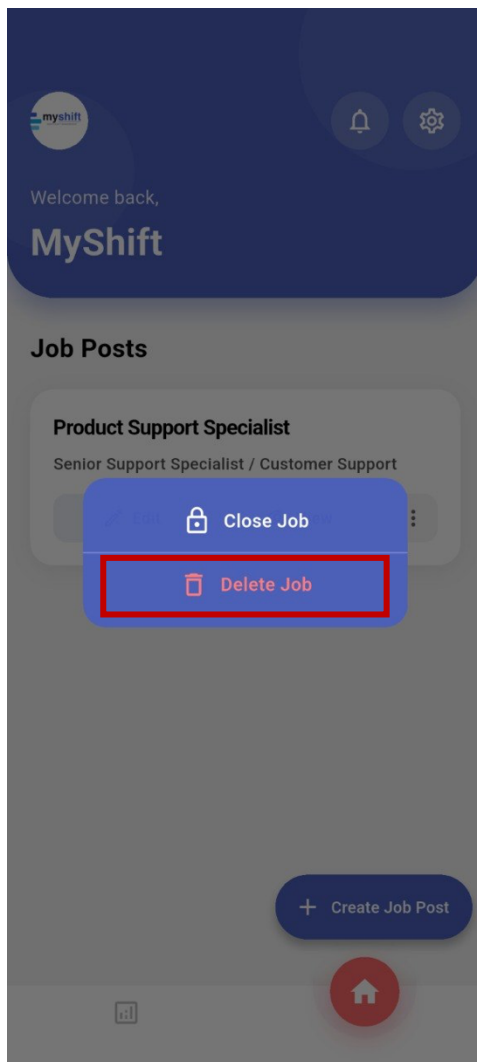

Figure 96: Delete Job Option.

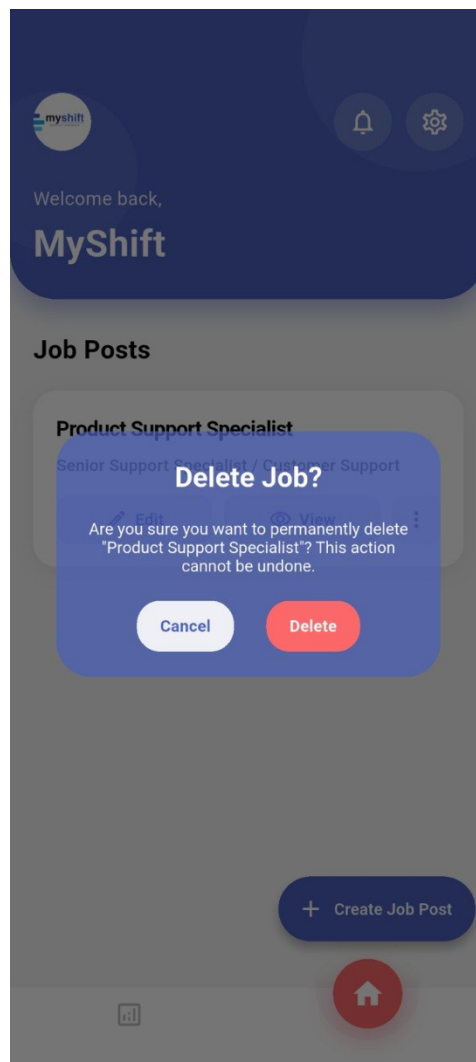

Figure 98: Delete Job Confirmation Message.

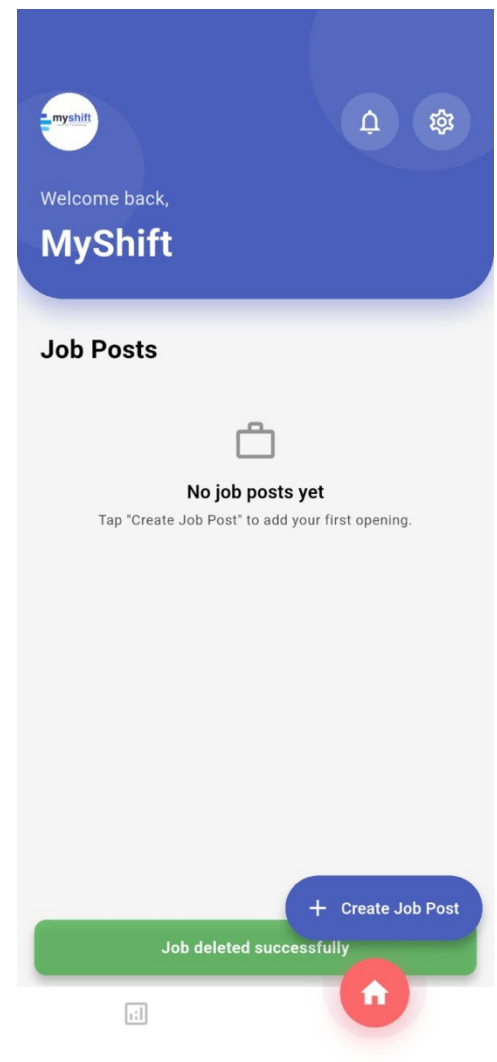

Figure 97: Job Deleted Successfully.

7 Applicant Management

7.1 View Applicants

After selecting a job posting, companies can access the Applications page to view all submitted candidates for that position.

- The Applications page displays the following information for each job post:
- Total number of applications received.
- Number of pending, shortlisted, and rejected applications.
- Candidate ranking and final score.
- Report generation status, where a "Report ready" message is displayed when an evaluation report is available.

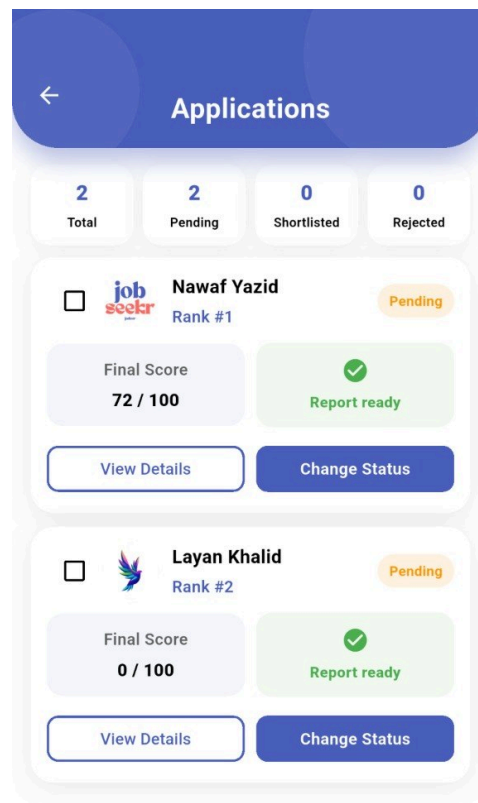

Figure 101: Applications page showing candidate list with rankings, scores, and report status.

7.2 Change Candidate Status

Company users can change a candidate's status by tapping the Change Status button on the Applications page. The available status options are Shortlisted and Rejected. Once the status is changed, the system automatically refreshes the application statistics and displays a confirmation message.

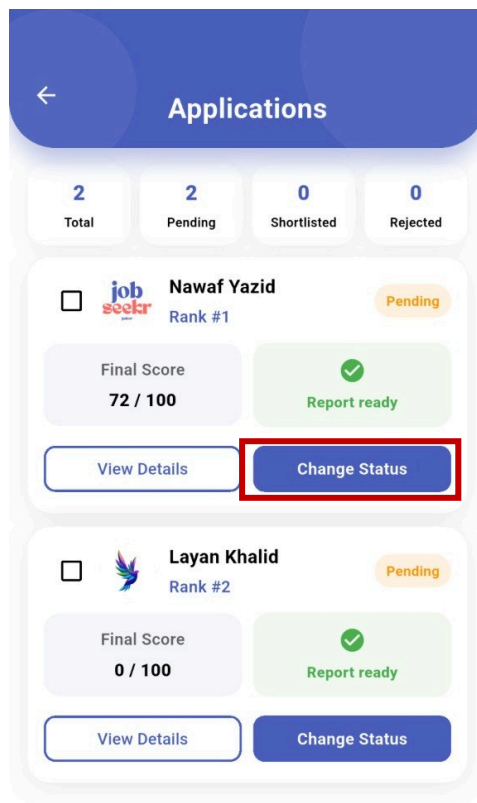

Figure 102: Change Status button.

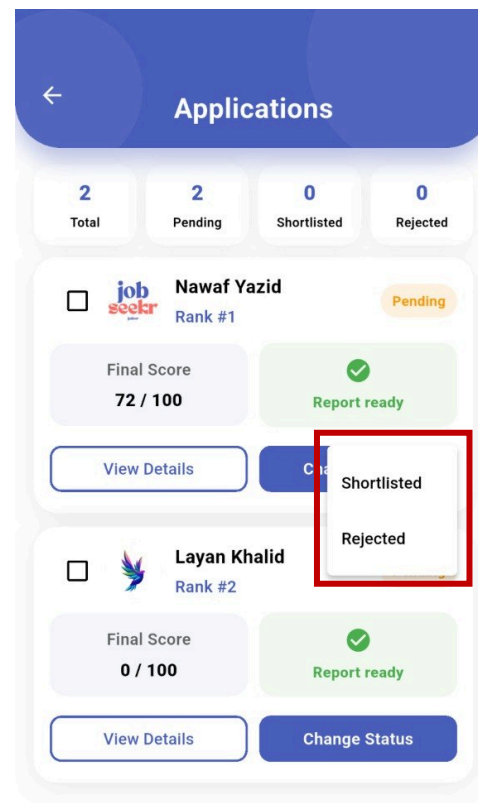

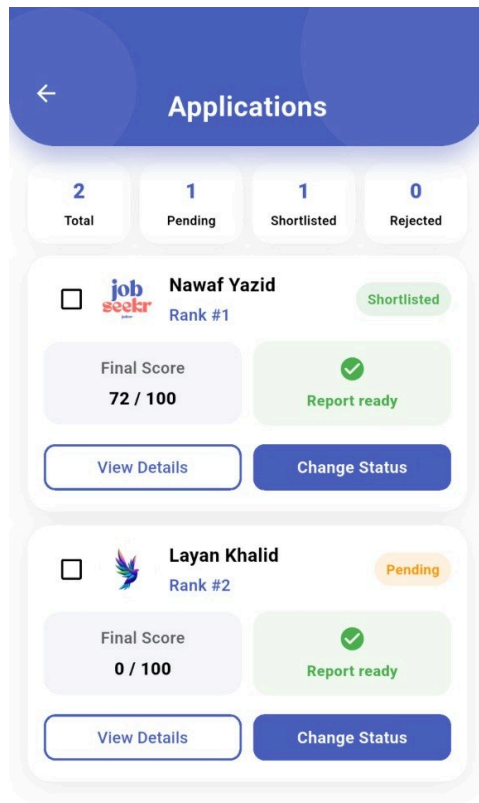

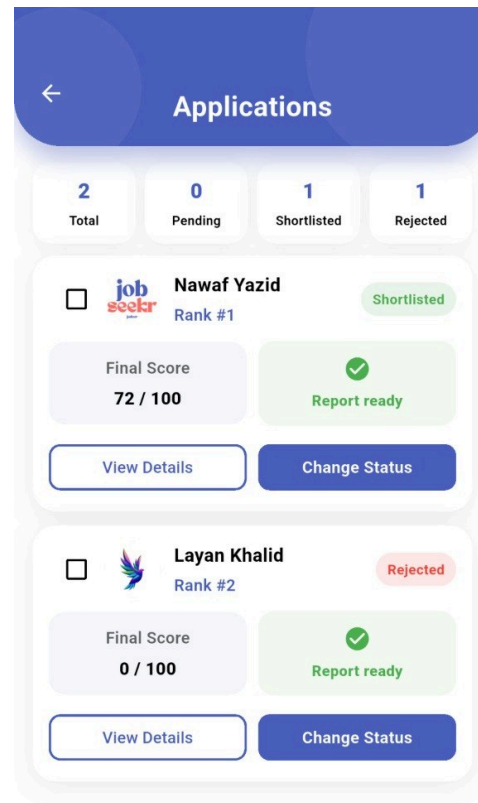

Figure 103: Status options dropdown displaying Shortlisted and Rejected.

Status updated to Shortlisted

Figure 104: Applications page after status changed to Shortlisted, with confirmation message.

Status updated to Rejected

Figure 105: Applications page after status changed to Rejected, with confirmation message.

7.3 Candidate Details

Company users can access candidate information by tapping View Details on the Applications page. The Candidate Details page provides a comprehensive overview of the candidate's profile, evaluation results, and submitted documents.

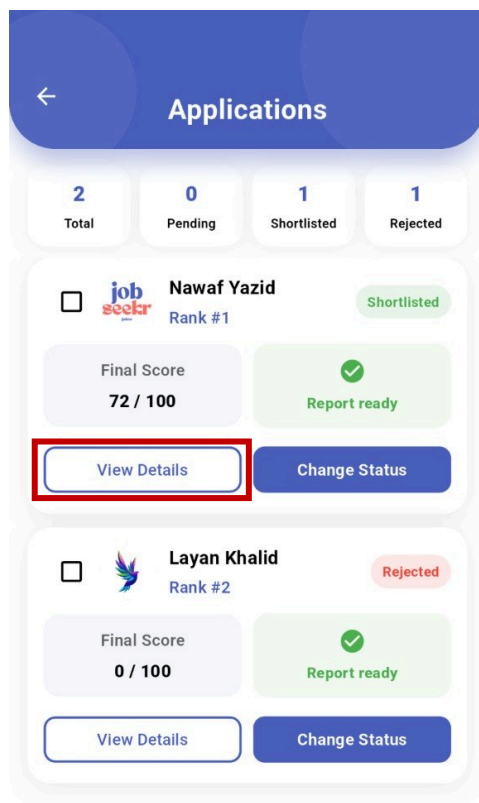

Figure 106: View Details button.

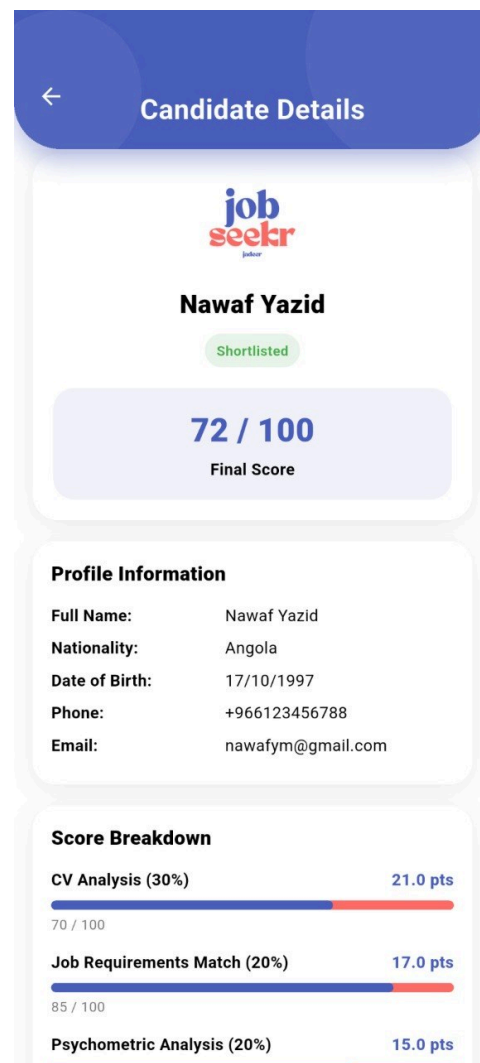

Figure 107: Candidate Details Page.

7.3.1 Profile Information

The Candidate Details page displays the candidate's full name, nationality, date of birth, phone number, email address, and current application status.

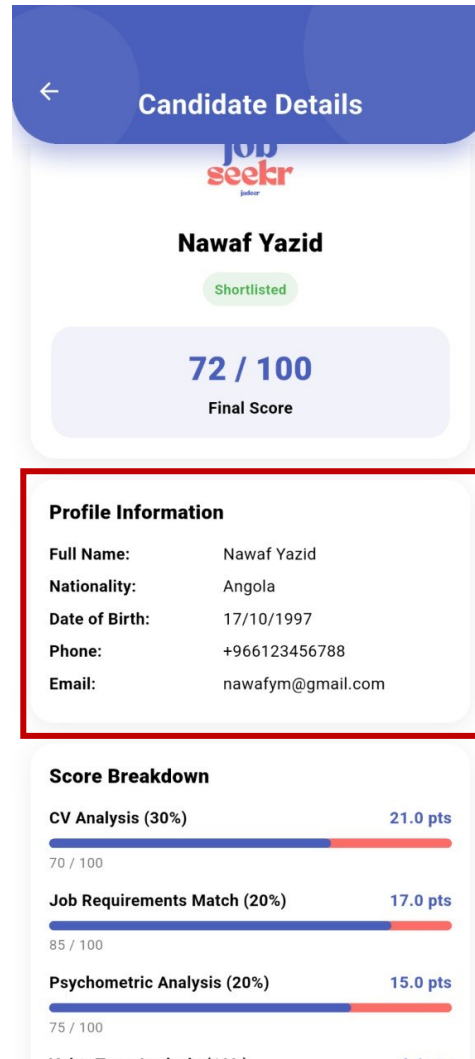

Figure 108: Candidate profile information.

7.3.2 Evaluation Score

The page displays the candidate's final evaluation score out of 100, along with a breakdown of scores across multiple assessment categories:

- CV Analysis (30%)
- Job Requirements Match (20%)
- Psychometric Analysis (20%)
- Voice Tone Analysis (20%)
- Technical Evaluation (10%)

Each category contributes to the candidate's overall score and final recommendation.

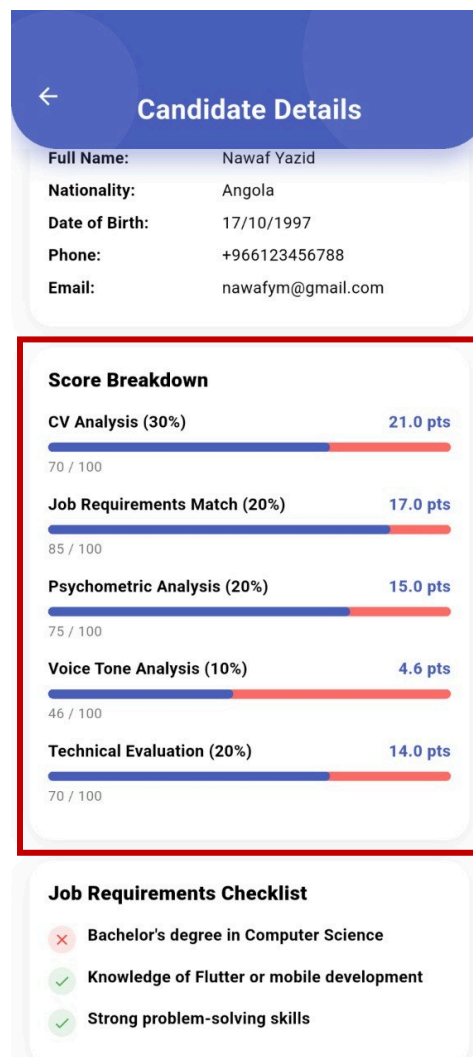

Figure 109: Score breakdown.

7.3.3 Job Requirements Analysis

The system compares the candidate's qualifications and experience against the requirements specified in the job posting. Matched and unmet requirements are displayed separately to help companies identify strengths and missing qualifications.

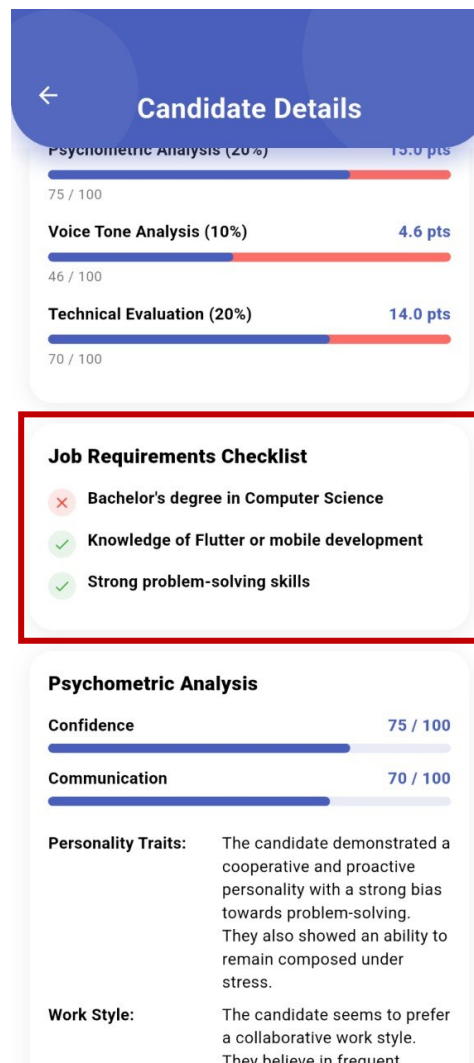

Figure 110: Job Requirements Checklist.

7.3.4 Psychometric Analysis

The evaluation report includes a psychometric analysis to assess behavioral and personality-related characteristics demonstrated through the candidate's responses. The analysis includes indicators related to communication style, openness to feedback, confidence, problem-solving approach, and work behavior patterns.

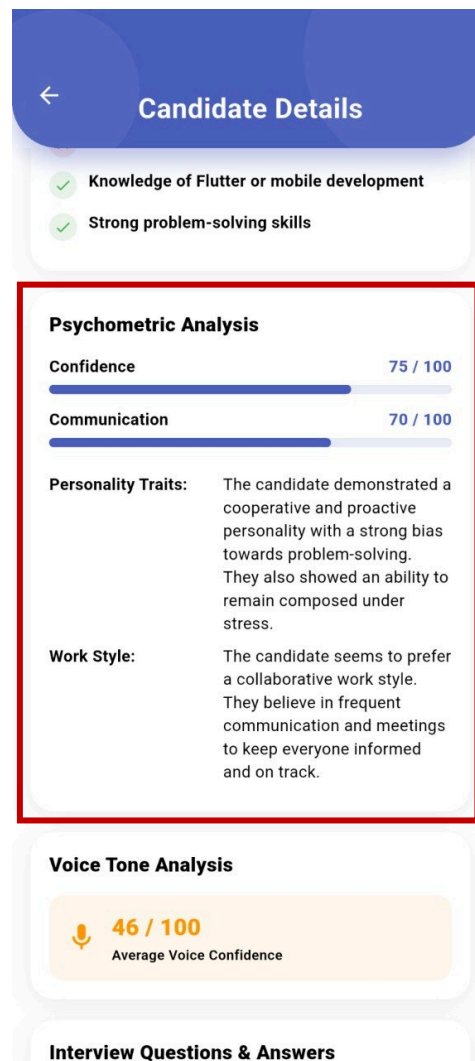

Figure 111: Psychometric Analysis.

7.3.5 Voice Tone Analysis

The system evaluates the candidate's communication performance based on recorded interview responses and provides a confidence score to support candidate assessment.

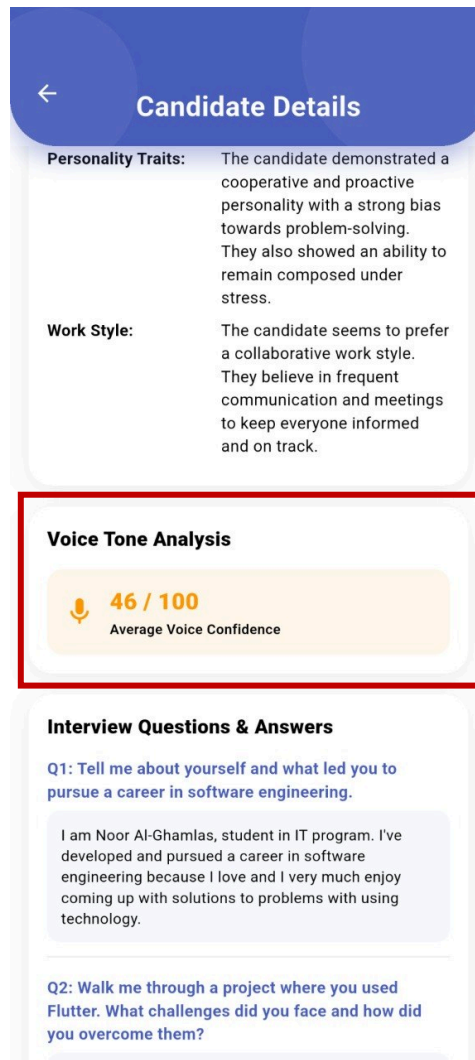

Figure 112: Voice Tone Analysis.

7.3.6 Interview Questions and Responses

Company users can review the candidate's interview responses directly from the Candidate Details page. The section displays the generated interview questions alongside the candidate's answers, which are included in the AI evaluation process.

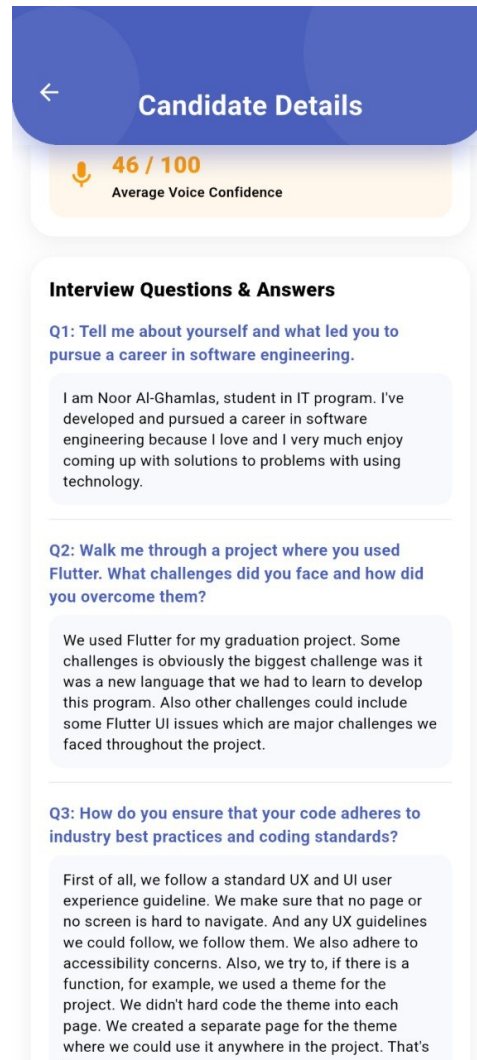

Figure 113: Interview Questions & Answer.

7.3.7 Candidate Documents

The Candidate Details page provides access to supporting candidate documents. Company users can view or download the candidate's CV and evaluation report. A confirmation message is displayed after a successful download.

Figure 114: Candidate Documents.

Figure 115: View CV button.

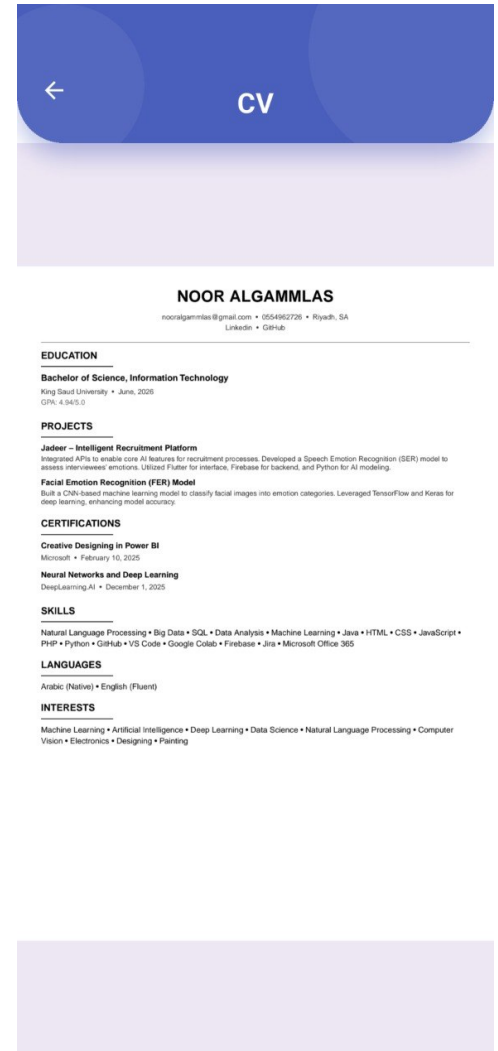

Figure 116: View CV Page.

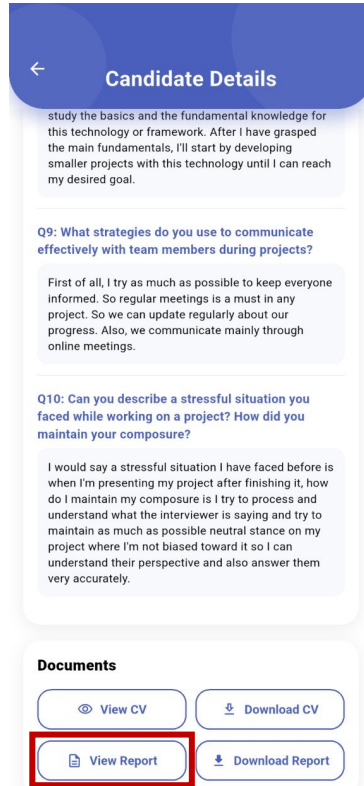

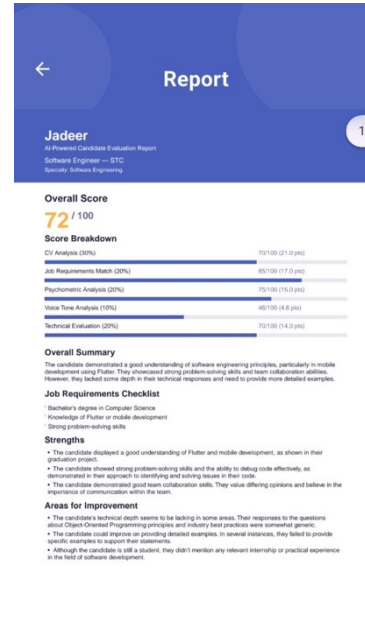

Figure 120: View Report button.

Recommendations

- The candidate should focus on deepening their understanding of crucial software engineering concepts and practices.
- They could benefit from providing more detailed examples to illustrate their skills and experiences.
- The candidate should consider gaining practical experience through internships or relevant projects to strengthen their application.

Psychometric Analysis

Confidence: 70/100
Communication: 70/100
Personality: 70/100
The candidate demonstrated a cooperative and proactive personality with a strong bias towards problem-solving. They also showed an ability to remain composed under stress.

Voice Tone Analysis

Average Voice Score: 46/100
CV Assessment Score: 92/100
Height: Good professional presence with minor speech artifacts.

Candidate Details

study the basics and the fundamental knowledge for this technology or framework. After I have grasped the main fundamentals, I'll start by developing smaller projects with this technology until I can reach my desired goal.

Q9: What strategies do you use to communicate effectively with team members during projects?

First of all, I try as much as possible to keep everyone informed. So regular meetings is a must in any project. So we can update regularly about our progress. Also, we communicate mainly through online meetings.

Q10: Can you describe a stressful situation you faced while working on a project? How did you maintain your composure?

I would say a stressful situation I have faced before is when I'm presenting my project after finishing it, how do I maintain my composure is I try to process and understand what the interviewer is saying and try to maintain as much as possible neutral stance on my project where I'm not biased toward it so I can understand their perspective and also answer them very accurately.

Jadeer
AI-Powered Software Evaluation Report
Software Engineer - JSTC
Industry: Software Engineering

Overall Score
72 / 100

Score Breakdown
CV Analysis (20%) 75/100 (21.0 / 26.0)
Job Requirements Match (20%) 85/100 (17.0 / 26.0)
Psychometric Analysis (20%) 75/100 (15.0 / 26.0)
Voice Tone Analysis (10%) 45/100 (4.5 / 13.0)
Technical Evaluation (25%) 75/100 (14.5 / 26.0)

Overall Summary
The candidate demonstrated a good understanding of software engineering principles, particularly in mobile development using Flutter. They showcased strong problem-solving skills and team collaboration abilities. However, they lacked some depth in their technical responses and need to provide more detailed examples.

Job Requirements Checklist
Bachelor's degree in Computer Science
Knowledge of Flutter or mobile development
Strong problem-solving skills

Strengths
The candidate displayed a good understanding of Flutter and mobile development, as shown in their problem-solving process.
The candidate showed strong problem-solving skills and the ability to debug code effectively, as demonstrated in their approach to identifying and fixing issues in their code.
The candidate demonstrated good team collaboration skills. They value differing opinions and believe in the importance of communication within the team.

Areas for Improvement
The candidate's technical depth seems to be lacking in some areas. Their responses to the questions about Clean Code and Programming principles and industry best practices were somewhat generic.
The candidate could improve on providing detailed examples. In several instances, they tended to provide generic answers to support their statements.
Although the candidate is still a student, they didn't mention any relevant internship or practical experience in the field of software development.

Recommendations
The candidate should focus on deepening their understanding of crucial software engineering concepts and practices.
They should benefit from providing more detailed examples to substantiate their skills and experiences.
The candidate should consider gaining practical experience through internships or relevant projects to strengthen their application.

Psychometric Analysis
Confidence: 75/100
Communication: 75/100
Teamwork: 75/100
The candidate demonstrated a cooperative and proactive personality with a strong bias towards problem-solving. They also showed an ability to remain composed under stress.
Voice Data: The candidate seems to prefer a collaborative work style. They believe in frequent communication and meetings to keep everyone informed and on track.

Voice Tone Analysis
Average Voice Score: 45/100
CV Assessment Score: 82.5/100
Speech: Good (Demonstrated presence with minor speech artifacts)
Eye: Moderate (Score: 75.0/100)
Energy: Good (Demonstrated presence with minor speech artifacts)
EQ Assessment Score: 45.0/100
Empathy: Good (Score: 45.0/100)
Empathy: Good (Score: 45.0/100)
Empathy: Good (Score: 45.0/100)
